CHATBOT SERVICES

OneGlobe
Data to Clarity

What are Chatbots?

Chatbots are computer programs that automate certain tasks, typically by chatting with a user through a conversational interface.

Why Chatbots?

Consumers prefer using a messaging app when contacting a business

Growingly Consumers want to make a purchase through a mobile interface

Customers expect a business to be open 24/7 all year round

OneGlobe's Chatbot-as-a service allows businesses to easily deliver content, automate replies and engage customers powered by Artificial Intelligence.
