TO WHOM IT MAY CONCERN

At Varsity, our goal is to build an innovative education system focused on multi-sensory learning and leadership. Data is one of our biggest assets and Data Recovery is a key component of our business continuity strategy. We chose Oracle Cloud and OneGlobe as our strategic partner to put in place a robust and reliable Cloud DR setup. We could not have achieved this goal without a partner like OneGlobe who brought in all the required skills - cloud advisory, consulting and implementing skills along with their knowledge of core applications and technology skills. I highly recommend OneGlobe as a partner to deliver on your Cloud strategy.'

Thanking you,

Jitendra Nath,
Chief Technology Officer.
