

GET MORE FROM G7

MOUNTING AND CHARGING OPTIONS

For G7 solutions to provide value for your personnel, they must be easily accessible and charged, ready for use. Many businesses assign G7 devices individually to each employee in need of real-time safety monitoring. Others may share devices among a team of personnel and are used as required, such as when entering a facility.

BATTERY LIFE

Ensuring that G7 devices are ready for a full shift, they feature a battery runtime of more than 18 hours. At the end of each shift, a G7 device requires three to four hours of charging time to ensure it's ready for the next shift.

CHARGING

Each G7 product kit includes a wall charger, USB cable and charge clip. The wall charger plugs into a power socket and the USB cable connects between the charger and the charge clip. The charge clip slides onto the bottom of G7, making contact with weather-proof contacts molded into the enclosure.

USAGE COMPLIANCE

Blackline offers regular reporting to help customers view equipment usage by each employee in order to ensure gas detection and lone worker usage policies are being met. One easy way to increase compliance is to wall-mount G7 devices, providing high visibility and quick access to charged devices.

MOUNTING AND CHARGING ACCESSORIES

Blackline Safety has a number of mounting and charging options to make it easy for businesses to ensure all G7 equipment is ready for use.

SINGLE-UNIT WALL-MOUNT

A single-unit G7 wall-mount is available that enables G7 to be prominently placed onto a wall charger at the end of a shift. Personnel beginning their next shift are reminded to take their G7 safety monitoring device with them. A charge clip, USB cable and USB charger are included with every G7 device. Two options are available — one with and one without a charge clip, USB cable, wall charger and fasteners.

Single-unit G7 wall-mount

- Mount G7 prominently
- Easy to keep G7 charged
- Ideal for shared devices
- Uses G7 charge clip, USB cable and wall charger supplied with G7 device (not included)

PN: ACC-WALL-BRK

Single-unit G7 wall-mount and charger

- Same as above but includes a G7 charge clip, USB cable, wall charger, mounting screws and drywall anchors

PN: ACC-WALL-CHG-BRK-BLK-NA

"Giving quick access to charged G7 devices helps employees use safety technology according to policy. Wall-mounting increases G7 visibility and ensures devices are always ready for use."

— Phil Benson, Director of User Experience

CHARGER OPTIONS

To accommodate a broad range of business needs, Blackline produces a selection of charger accessories that help teams get the most from G7. The following charger accessories are available:

- Replacement charge clip
- Single USB charger kit (regional plugs available)
- Five-way USB charger (regional plugs available)
- Vehicle USB charger

WALL MOUNT PANELS

Larger quantities of deployed G7 equipment may benefit from use of one or more five-unit or 20-unit wall-mounted charging panels. Both panel types include pre-installed G7 mounts, charge clips, USB cables and a wall charger. Regional plugs are to accommodate international requirements.

Charge clip

- Included with every G7 device
- Can be purchased as a spare part

PN: ACC-LNS-CLIP

Single USB charger kit

- Included with every G7 device
- Includes a charge clip, USB cable and charger
- Regional power plugs are available
- Can be purchased as a spare part

PN: ACC-LNS-CHG-NA

Five-way USB charger

- Charge up to five devices simultaneously
- Regional power plugs are available
- Shown with charge clips that are supplied with G7 devices (not included)

PN: ACC-MUL5-CHG-NA

Vehicle USB charger

- Charging of G7 from a vehicle 12 VDC power point (G7 turns off automatically when charging to prevent alerts)
- Uses USB cable and charge clip supplied with G7 devices (not included)

PN: ACC-CHG-CAR

Five-unit and 20-unit wall-mounted charging panels

- Mount G7 devices prominently
- Easy to keep G7 devices charged
- Ideal for shared devices
- Includes device mounts, charge clips, USB cables and USB power supply
- Regional power cables are available

20-unit PN: ACC-CHG-PNL-20-NA

Five-unit PN: ACC-CHG-PNL-5-NA

ABOUT BLACKLINE SAFETY

Blackline Safety is a leader in turnkey connected safety solutions that monitor thousands of personnel around the clock. We have every box checked when it comes to wireless gas detection and keeping lone workers safe — including real-time communications, comprehensive location technologies and real-time emergency response management.
