

PERM-A-BARRIER®

VPS 30

PRIMERLESS, VAPOR-PERMEABLE AIR BARRIER

Reduce installation time by up to 35% compared to membranes requiring primer

PERM-A-BARRIER® VPS 30 sheet-applied air barrier offers unparalleled installation speed and efficiency. These high-performance air barriers eliminate the need for primer, while providing exceptional adherence to the substrate. Our proprietary formulation offers aggressive adhesion, simplifying application and ensuring optimum, long-term vapor permeable performance.

PERM-A-BARRIER® VPS 30 product advantages include:

- **No primer required**, accelerating application time and eliminating time-consuming cleanup
- **Vapor permeable** with the convenience of a sheet-applied membrane
- **NFPA 285 compliant** in a range of wall assemblies
- **Tenacious adhesive** provides strong bond to concrete, CMU or exterior gypsum to ensure a continuous protection layer
- **Low temperature application** (down to 25°F) for greater project flexibility
- **150-day UV exposure** takes the pressure off when projects are delayed

A Comprehensive System Solution

Labor represents a significant portion of the installed cost of an air barrier. Eliminating primer application reduces installation time by up to 35%.

Primerless technology eliminates the need for primer rollers and the potential for spill-related clean-up, waste and disposal activities, as well as delays due to drying time. Get the job done faster with significant reductions in materials and labor costs.

Expert Support, On Demand

Our Technical Service and Support Team provides access to industry-leading air barrier and building envelope knowledge and experience to help ensure your project success. Our team can provide ongoing advice and guidance, as well as installation training.

Our team has expertise with the NFPA 285 fire propagation test standard, and PERM-A-BARRIER® air barriers have been tested to the standard in a variety of exterior wall assemblies. This experience provides us with an extensive knowledge base that is available to help architects and building engineers specify exterior wall materials that are optimized for fire safety.

PERM-A-BARRIER® VPS 30 membrane is just one component of our comprehensive air barrier system, including:

- **PERM-A-BARRIER® NPS detail membrane** — Primerless flashing for protecting and sealing critical detail areas
- **PERM-A-BARRIER® aluminum flashing** — Aluminum-faced, fully-adhered flashing for protecting and sealing critical detail areas
- **PERM-A-BARRIER® detail membrane** — Fully-adhered flashing for protecting and sealing critical detail areas
- **PERM-A-BARRIER® wall flashing** — Fully-adhered through wall flashing system
- **PERM-A-BARRIER® liquid flashing** — Fluid applied flashing membrane and detailing accessory

To learn more about the PERM-A-BARRIER® VPS 30 membrane, contact GCP Applied Technologies today at 1-866-333-3726.
