Meeting Management

AskCody ®

Search for all meeting rooms or hot desks across multiple locations and time zones. Instantly know the availability of the room before you try booking it or see who has booked the room if it's occupied, and when the room will be released.

AskCody RoomFinder lets you search for all meeting rooms across multiple locations with ease. Finding an available room has never been easier!

You can search and sort by purpose of a meeting (e.g. video conference), that special feature (room with a white board or projector), or search for a meeting room with a a guaranteed minimum capacity.

AskCody RoomFinder boosts your productivity and room utilization instantly!

Need to check meeting room availability for a meeting across multiple locations? Across multiple time zones? And with special features like video conferencing equipment? RoomFinder gives you just that! And more...

Now you can add that tool you have been searching for to your Outlook Calendar so that you can find that specific room you need without worrying about cumbersome room lists or meaningless room names.

Now you can find a room that actually fits your specific need for that special meeting - even across multiple locations and across multiple time zones. You can even see if the room is available or occupied before you try to book it.

There's a complete management backend behind!

With RoomFinder Manager you can easily manage all meeting rooms, locations, meeting room equipment and services, and make it easy for all employees to search for that special room.

You will instantly enhance productivity and room utilization by controlling or regulating meeting room booking behaviour by selecting pre-selected purposes. That helps Facilities Management do their job and optimize resources and utilization of meeting spaces.

The RoomFinder Manager is a one-stop interface that's built into the same Management solution as Meeting+ and Welcome+. Now you only need one place to manage both meeting rooms and booking of associated services.

Use RoomFinder together with Insights and see your workspace in full context

With Insights you will see your office and meeting rooms in full context with all available data about utilization. You can easily experience how your office space and meeting rooms are actually being used and make the most out of your workspace.

With RoomFinder and Insights you can go deeper into conference room activity, with daily reporting for key metrics like meetings and occupancy, no shows and ghost meetings, duration and attendees and get the insights and trends displayed in a beautiful dashboard.

Why RoomFinder?

- Search for available rooms across multiple locations and acroos multiple time zones

- Instantly know status or availability of the room before you try booking it. Even see who has booked the room if it's occupied

- Search for meeting rooms that suits the purpose of the meeting, e.g. "Video Conference" or "Internal Meeting"

- Search for meeting rooms with the right facilities or capabilities to suit your meeting. Also across multiple locations!

- Enhance productivity and room utilization by controlling or regulating meeting room booking behaviour
