

Knowledge Day Agenda

16th November - SafetyNet Day

This Knowledge Day is focused upon reviewing the functionality and best practice usage of our **SafetyNet** product. The day will also provide an overview of **Vistair Intelligence**, a product being developed to optimize the management reporting opportunities from SafetyNet data generated.

SafetyNet

Vistair Intelligence

Particular new SafetyNet features will include:

- **HFACS** – Enables operators to capture any Human Factors that might have played a part in a Safety Report needing to be raised.
- **Editable 376 Mapping** – Supporting the Regulation 376 E5X file mapping through the introduction of editable fields bypassing software code change requirements.
- **Email Template editor** – Development of Operator control of email templates to replace hardcode change requests.
