TIME SAVINGS

Average wash cycle times (mins):

Hydrofinity

v

Conventional

Annually, this can save
1,425 hours or **10 working weeks...**

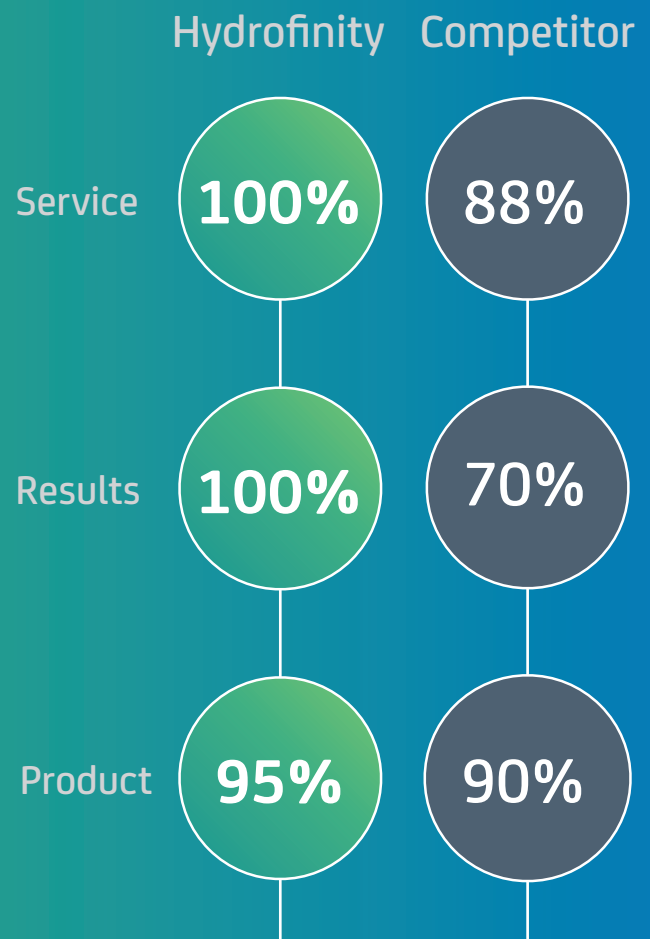

Saving £11,157 on labour costs

WATER SAVINGS

Annually, the Hydrofinity system uses
1.1 million litres less water...

Saving £3,744 on water bills

CUSTOMER SATISFACTION

So many guests comment on how our towels are
fluffy and fresh!

Since we switched to the Hydrofinity system we have received so many compliments. Our towels are the whitest they've ever been!

A SHARED PASSION FOR DELIVERING EXCEPTIONAL GUEST EXPERIENCE

HYDROFINITY & HILTON SHARED VALUES

Improving Guest Satisfaction

Hydrofinitiy - a global leader in sustainable laundry solutions - understand that cleanliness is critical when it comes to protecting the Hilton brand. Cleanliness impacts guests' experience and loyalty, so it is crucial to consistently deliver a clean, fresh first impression.

A Hydrofinitiy system can work wonders on improving Hilton SALT scores too!

Preserving the Environment

We have a mutual commitment to the environment. Over the past decade, the Hilton group has reduced energy use by 14.5%, carbon output by 20.9%, waste output by 27.6%, and water use by 14.1%. On this latter point, Hydrofinitiy can accelerate the water savings dramatically with their sustainable washing solution.

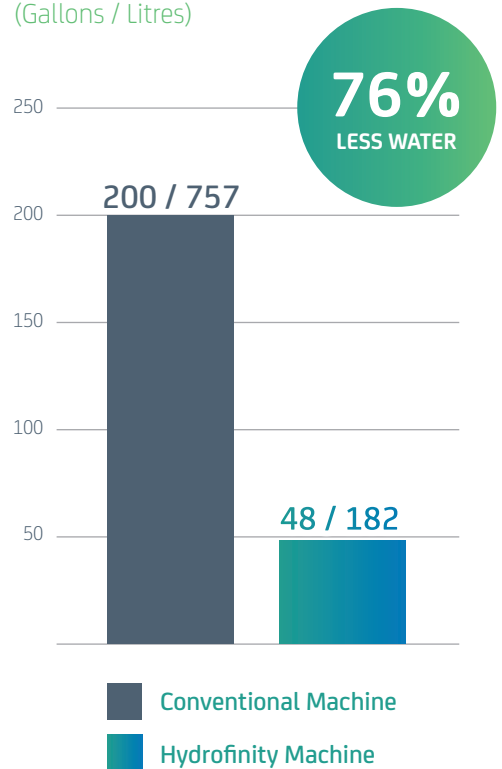

HOW HYDROFINITY CAN HELP

Hydrofinitiy are confident that they can reduce costs and improve guests' experience, which will help increase Hilton profitability, no matter what their current laundry set-up is.

- If you have an **on-premise laundry**, a laundry upgrade could save you over £15K and more than 2.6 million litres of water per year
- If you **out-source laundry**, bringing it back in-house could save you over £50K per year and improve linen quality and longevity
