

Directions to Twin Rivers Technologies

Twin Rivers Technologies is located at 780 Washington Street, Quincy, MA 02169. If you are using a GPS, it will take you to the rotary very near our facility.

If you know the area, we are located almost under the Fore River Bridge.

From Quincy: When you arrive at a rotary at the foot of the bridge, **do not** go over the bridge.

In the rotary, there is an access road between the entrance of the bridge and the Lobster Stop Restaurant. It is a street even though it may not look like one. Proceed down that street to the stop sign at the railroad tracks and take a left.

Visitors: After a second stop sign, there is an employee/visitor parking lot on the right. Visitors can park in that lot. Proceed to the guard station and show your ID. He will announce your arrival to whomever you are scheduled to meet. Please note: You will not be allowed on the premises without a picture ID

Truck drivers will proceed to the scale in front of the Guard Station and then proceed inside the Guard Station to begin the check in process.
