

UNIFIED COMMAND OF DATA MADE EASY WITH COUNTYWIDE FIRE SOFTWARE

Emergency Reporting® (ER) Fire & EMS Software is a user-friendly & powerful data management solution for any agency, but it's even better when used by the entire county.

Save your personnel time spent on redundant paperwork when providing mutual aid by taking advantage of shared incident reporting through Agency Friends, an exclusive feature only available from ER, that makes giving and receiving mutual aid a lot easier.

SHARED DATA WITH AGENCY FRIENDS

Make data-driven decisions with reports that capture data from other agencies you designate as agency friends. Easily share inspection reports, hydrant, occupancy, and apparatus data.

FULLY CUSTOMIZABLE

ER's countywide solution allows each agency in a county to choose the package that works best for them, including the ability to utilize the FirstPCR feature that documents patient information related to EMS calls right into your ER account.

INDUSTRY STANDARD COMPLIANCE

Improve your ISO score, comply with NFPA 1500, NFPA 1710/1720, and NFPA 1300. Enhance your CRR program with OVAP scoring.

SAVE MONEY WITH A SHARED CAD LINK

Reduce data entry by integrating your CAD provider with Emergency Reporting, and split the cost with the other departments in your county.

EVERYTHING YOU NEED TO MANAGE YOUR ENTIRE AGENCY ONLINE

Emergency Reporting has been the premier cloud-based Fire, EMS, and community risk reduction platform since 2003. We currently support over 480,000 first responders and agency personnel worldwide.

ER offers the reporting modules needed for the fire service, such as LOSAP, maintenance, training, and more. ER has now been in Morris County since 2013, with the majority of fire departments using the system. We continue to hear nothing but good feedback. The Morris County Active Chiefs Alliance continues to promote ER and is extremely satisfied with its performance.

- David Kaplan, President Morris County Alliance of Active Fire Chiefs (NJ)
