

Electronic Health Records

SPECIFIC. EFFICIENT. PROVEN.

INDUSTRY LEADING EHR

Nextech EHR is a cloud-based, specialty-specific solution available with an affordable monthly subscription. Customizable to each physician's individual workflow and unique charting preferences, Nextech's EHR software is designed to function in a way that best suites each practice and individual users needs.

This highly mobile EHR provides all the tools clients need to take control of their workdays, improve workflow efficiency and offer quality patient care.

ENCOUNTER READINESS

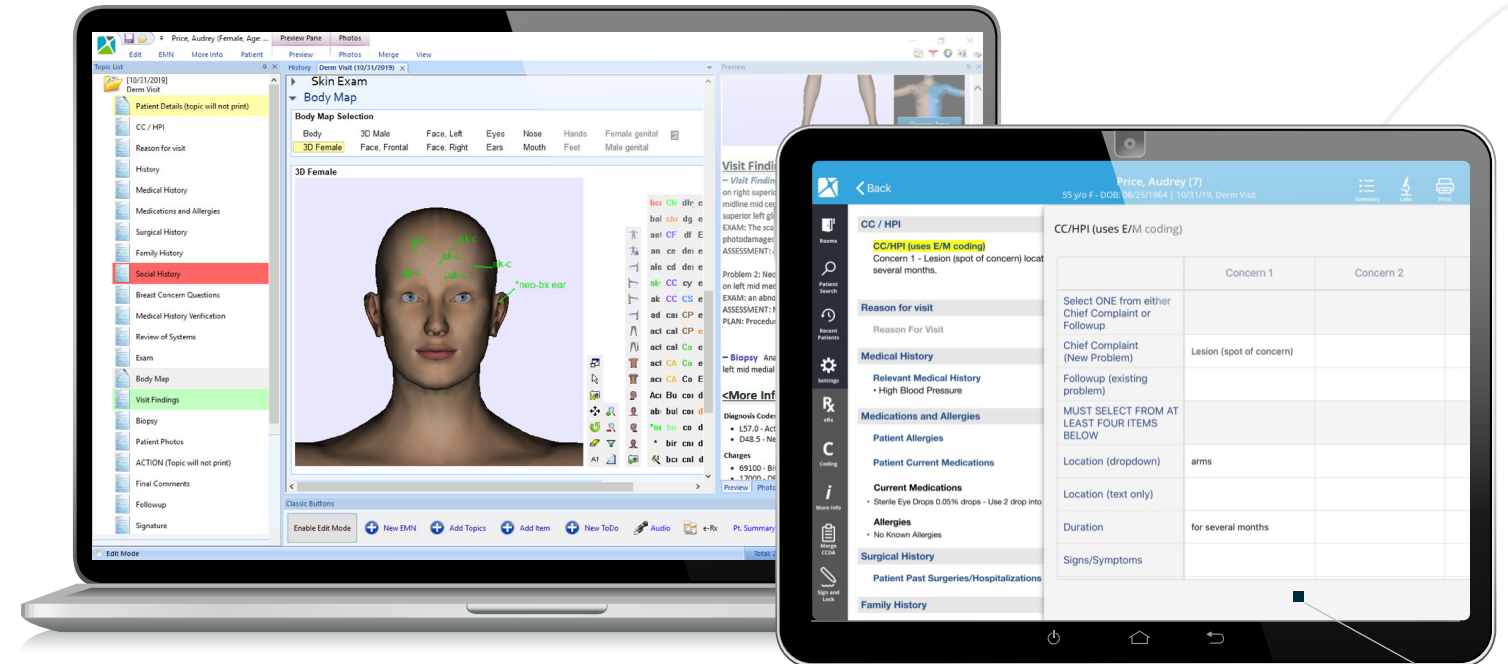

Patient Journey Tracking

Improve clinical efficiency with the ability to **track every step of the patient journey** from the moment of check-in to the time of checkout. You'll discover ways to reduce wait times, avoid bottlenecks and identify delays with built-in monitoring capabilities designed to help you provide a better patient experience.

Chart Summary

Ensure encounter readiness with **an easy to understand chart summary** that provides a readily available snapshot of patient information, history and data over time before each encounter.

OPTIMAL CHARTING EXPERIENCE

Electronic Health Records

Chart with unmatched speed and efficiency, improving documentation and the patient care experience. Nextech EHR is available for use on both iPad and PC, providing time-saving flexibility that allows providers to chart anytime, anywhere.

- **Built-in medical and cosmetic templates** can be customized to individual preferences for expedited and simplified charting.
- **Robust dictation** recognizes nearly all medical terms for a convenient hands-free charting experience.
- **Dual and multi-signature** capability allows multiple providers to sign off on a single chart.
- Customized views of relevant information for each patient allow users to **view a series** of multiple previous encounters at a time.
- Eliminate duplicate work and reentry of data with the ability to **prepopulate future charts** based on past history and conditional workflows.
- Document **multiple encounters** in a single note or maintain **two separate charts** at the same practice for a patient.
- Store and manage **consent forms**, including signature captures, in a secure, HIPAA-compliant electronic environment.
- Create **quick pick lists** for commonly used ICD and CPT codes, and choose responsibility per charge code from within the EHR.

VISUAL IMAGING TOOLS

Photo Management

Create a more immersive patient experience with built-in pre- and post-treatment photo management tools.

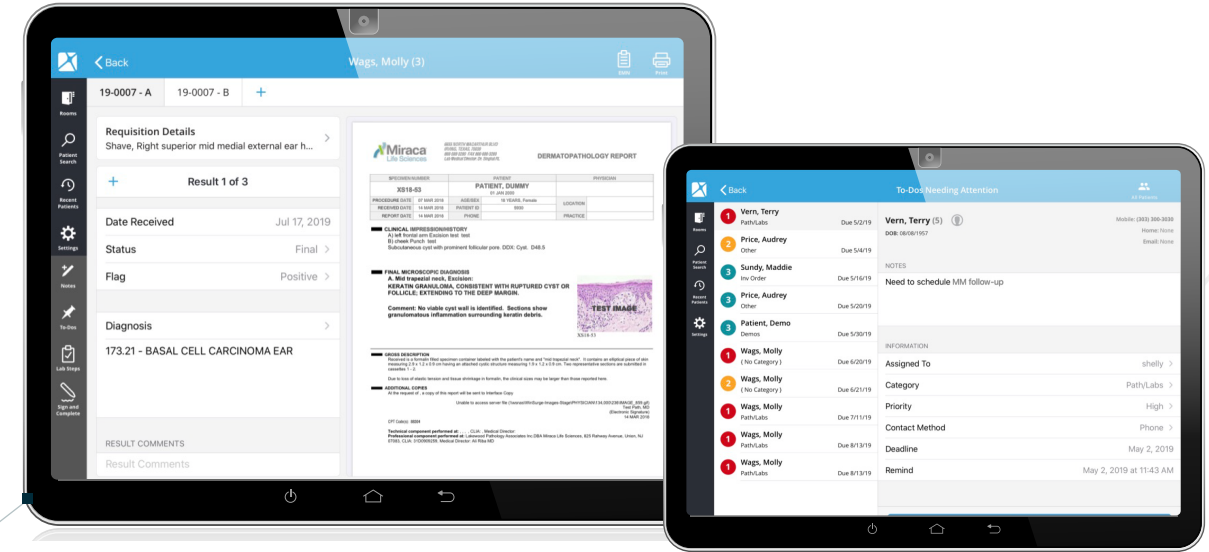

- **Import camera images** directly into the system and label them based on procedure, date and other category indicators.
- Track photos with **unique barcodes** created at time of import, allowing for easy organization management and photo archiving.
- Overlay images to contrast preop and postop transformations or create **side-by-side photo comparisons** from any angle.
- **Draw directly on imported photos** with the iPad, and use tools to pinch, control size and print.
- Quickly snap a series of **rapid-fire photos**, importing only those acceptable for use.
- Photos are **stored in native formats**, meaning users are not restricted by propriety usage rights.

Stamping

Smart stamps optimize clinical documentation, automating billing for specific findings to maximize physician efficiency, simplifying patient exams and improving charting accuracy.

- Visually express coding with **anatomical 3D model** images, with full rotation and all around viewability.
- With the **click of each stamp**, all exams, assessments, treatment plans and billing codes are prepopulated.
- Easily take **snapshots of locations and diagnoses** for later reference.
- View **images over time** as well as by procedure for convenient tracking of patient history, progress and outcomes.
- Easily adjust quantities and automatically generate **quantity-based CPT codes**, reducing the risk of missed charges.

ENHANCED COMMUNICATION

Communication Tools

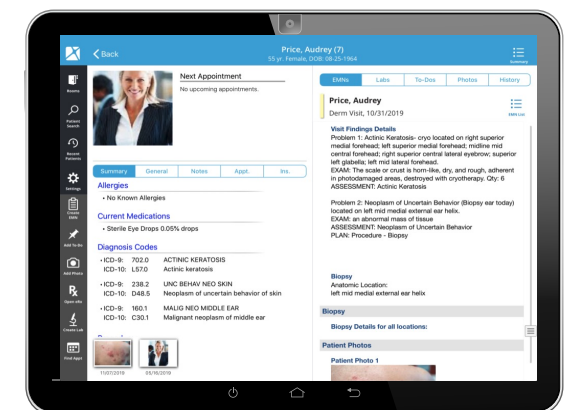

Experience a higher level of practice efficiency by leveraging the speed and convenience of Nextech EHR's secure, HIPAA-compliant communication tools.

- **Customize user-based dashboards** to supply personnel with the tools and information most relevant to their roles.
- **Convenient letter templates** make it possible to prepare customized communications on the fly.
- Easily **assign and track tasks for staff**, with the ability to view tasks yet to be completed.
- **Internal messaging** allows for secure and convenient intraoffice communication.
- **Create custom workflows** for clinical notes, labs, tasks and prescriptions.

STREAMLINED REGULATORY

Simplified Compliance

Nextech EHR is fully compliant with all current governmental regulations and can be used with all major registries. Relevant measures can be set to appear in the chart, ensuring there are no missed opportunities. We publish regular updates related to new regulatory changes and offer clients the opportunity to book consultations with our team of regulatory experts for valuable one-on-one guidance.

POWERFUL INTEGRATIONS

e-Prescribing

E-prescribing, powered by DrFirst, allows users to send prescriptions to pharmacies electronically, for both controlled and non-controlled substances, directly from the EHR.

Devices

Nextech integrates with most devices, allowing continued use of existing equipment with the ability to import data directly into the patient's record.

Patient Portal

Our fully-integrated patient portal employs the latest technology and security features to provide patients with online access to their health records, 24/7, from any web browser. When utilized with Nextech's EHR, the portal makes it possible for patients to provide details such as demographics, insurance information and medical history in advance of an appointment. Additional features such as online bill pay, allow patients to make secure, easy payments improving your practice's revenue while reducing delays in accounts receivable.

Labs

To best serve our users, Nextech EHR links directly to many major lab companies and includes seamless lab integrations that streamline the entire lab order process. Users are able to review lab results directly from the patient's medical record, without the need to navigate away from the page, ensuring optimal clinical efficiency.

THE COMPLETE SOLUTION

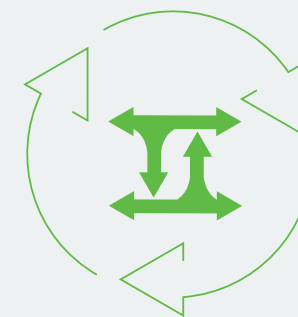

Partners

Nextech has developed an ever-expanding network of industry leading partners in both technology and healthcare. With direct integration or open API connections, users can easily partner with third-party companies to support additional efforts around every practice area while meeting the Common Clinical Data Set as defined by ONC.

Practice Management

Nextech's comprehensive Practice Management solution seamlessly integrates with Nextech's EHR, allowing you to run your practice more efficiently with advanced scheduling, centralized billing, robust reporting, real-time inventory management, marketing capabilities and more.

IMPLEMENTATION & PRACTICE DEVELOPMENT

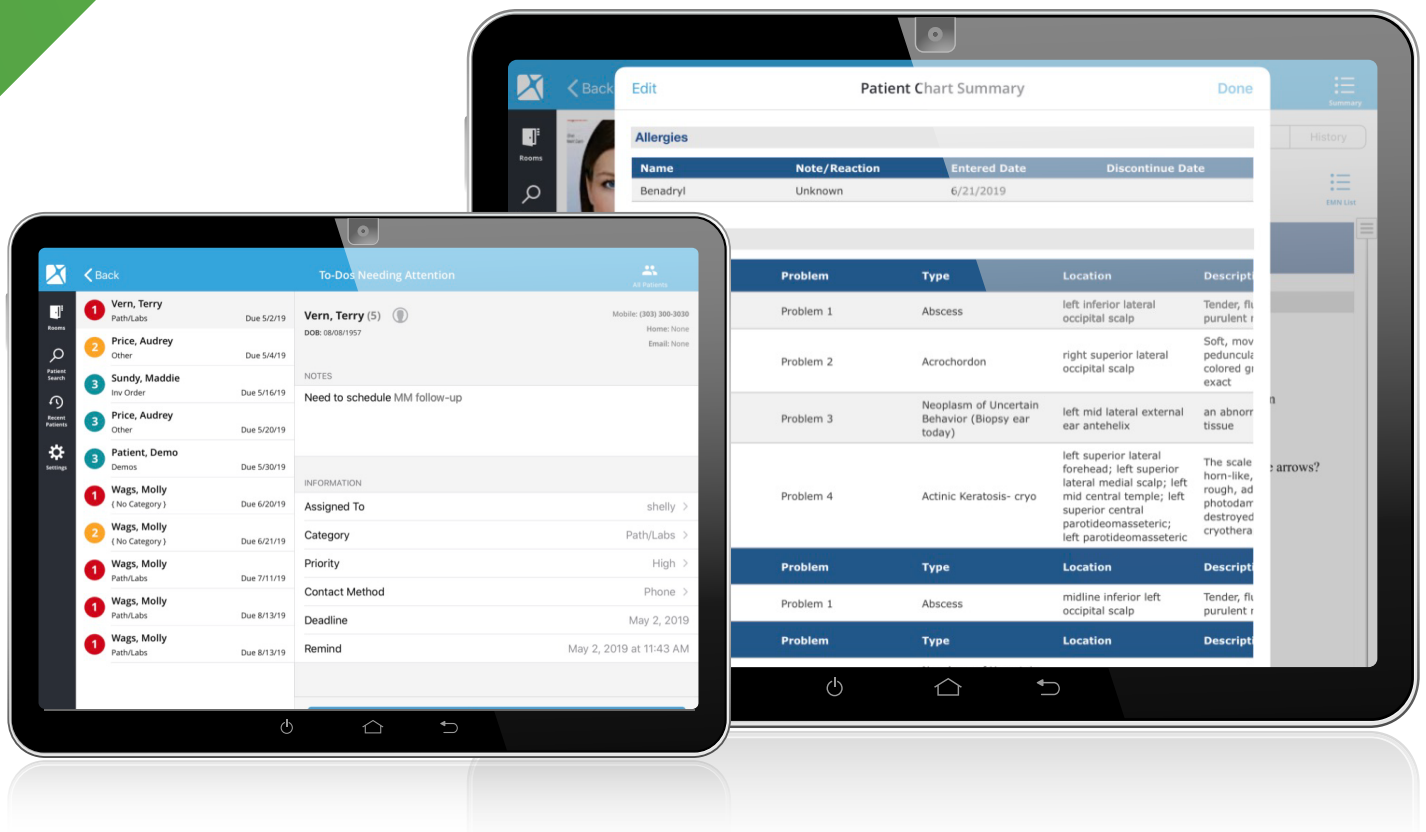

Implementation

Nextech's proven implementation strategy consists of a series of key phases that ensure users experience both immediate and long-term success. We've leveraged decades of experience to create our methodology, providing scalable and repeatably successful outcomes for our customers, resulting in a 96% customer satisfaction rating in overall experience.

Professional Services

With decades of combined practice management, clinical and industry experience, our team of experts can help take your specialty practice to the next level. When you partner with Nextech, you have access to personal guidance on how to streamline workflows, improve operational efficiency, generate additional revenue and grow your practice.

Nextech EHR

SPECIFIC. EFFICIENT. PROVEN.

Nextech offers complete healthcare technology solutions for specialty providers. Since 1997, Nextech has been focused on delivering intelligent, intuitive, integrated solutions that empower specialty physicians to maximize efficiency, optimize charting accuracy and increase overall practice profitability.

Nextech services more than 11,000 providers and 4,000 practices in the clinical specialties of Ophthalmology, Plastic Surgery, Dermatology and Orthopedics.
