

AGILE HIRING

SOLVING FOR SPEED, SCALE, AND RISK IN THE
HYPER-COMPETITIVE TECHNICAL HIRING LANDSCAPE.

BY GUN.IO

WHY ISN'T EVERYONE DOING IT?

IF YOU'RE NOT ALREADY SUPPORTING REMOTE CONTRIBUTORS TO YOUR TEAM, WE GET IT - SEEMS LIKE A HEAVY LIFT.

But for the first time in the history of work, we have the tools and software to not only support remote work, but make it even more effective than on-site. Still, investing the time and money to implement them - and to learn from the inevitable mistakes - is a huge step.

Gun.io was built to mitigate those growing pains. Remote, flexible work is here to stay, but your team shouldn't have to be turned on its head to embrace it. Engaging your first few remote employees via Gun.io is a low-risk way to dip your toes into agile hiring.

THE GUN.IO DIFFERENCE

IMPLEMENTING AGILE HIRING

From the moment they first engage us, Gun.io clients benefit from our evergreen talent recruiting efforts on their behalf.

We put each candidate through our proprietary 360 degree vetting process, and only select those who meet our exceptionally high standards for both technical and soft skills.

We front-load that work so our clients can focus exclusively on selecting the best-fit talent for the role.

BETTER TALENT * LESS RISK * MORE FLEXIBILITY
