

Ontellus Demonstrates SOC 2 Type II Data Security Compliance For Platforms And Operations

Independent audit demonstrates compliance and offers P&C insurers security for records retrieval

HOUSTON, Texas, August 13, 2019 – Ontellus, the nation’s largest records retrieval and claims intelligence company, announced it has successfully completed its 2019 independent SOC 2 Type II* compliance audit covering its records retrieval processing platforms and operations.

“As more insurers move to the cloud, expand the range of their technology partners, and continue to improve service delivery levels to their clients, they are increasingly entrusting the security of their data to service providers,” said Brian James, Chief Information Officer at Ontellus, “Ontellus has led the industry in implementing comprehensive security controls to protect our clients’ data.”

To ensure that the appropriate controls are in place and that they are working effectively, Ontellus undergoes this independent audit of its operations and technology environments annually. This audit, which is a must-have requirement for service providers, offers assurance that the information Ontellus holds is secure.

“Completing this audit is a testament to the commitment Ontellus makes to our comprehensive control framework and ensuring that our customer’s data is secure,” said Newton Ross, President, Ontellus, “Freeing our customers from this significant security concern and shouldering this responsibility on their behalf, helps ensure they can better focus on the business of insurance.”

For more information on Ontellus and their commitment to the highest levels of data security and compliance, visit the Data Security page at www.ontellus.com.

**SOC 2 Type II – Detailed audit and report of operational controls, as outlined by the AICPA’s Trust Services criteria for services covering security, availability, processing integrity, confidentiality, and privacy.*
