

## Simplify Records Organization and Accelerate Records Review and Analysis with SmartChron™

## PRODUCT OVERVIEW

SmartChron™ brings the antiquated records review process into the digital age with a complete case chronology of review-ready records.

Law firms and claims departments are using SmartChron™ to effortlessly generate a complete case chronology with indexed, review-ready records. As an additional technology component of the Ontellus customer portal, SmartChron™ enables legal and claims professionals to reduce paper handling, simplifying records organization and accelerate records analysis.

### Time & Money Savings with Effortless Records Organization

- **An Automated Case Chronology:** All records are automatically chronologically organized by date.
- **No More Redundant Work:** Newly added records are automatically added to the case chronology. Daily notifications alert users when an updated SmartChron™ is ready for review
- **Organized and Usable Records:**
  - Standard cover pages, table of contents, and bates stamps
  - Optical Character Recognition (OCR) enables full-text-search
  - Sorting features filter by record types and locations
  - Search features pinpoint relevant records
  - Secure access enables review by claims and legal professionals

### Fast, Effective Analysis with Records in a Single View

Case records are aggregated into a single file, offering a high-level overview of all available information. This aids in recognizing nuances, patterns, trends, and deep information analysis. Once obtained and processed via Ontellus' proprietary charting tool, records are **ready for review within 24-48 hours** and can be downloaded in seconds, accelerating time-to-analysis.

### Cost Certainty = Cost Savings

With a **flat-rate charge per file**, SmartChron™ helps law firms and claims departments avoid vague billing practices that charge hourly fees for records preparation. Ontellus also offers in-depth reporting and invoicing visibility.

### Proven Technology = Real Productivity Savings

Some of the **largest insurance carriers** in the U.S. are using SmartChron™ to aggregate their case and claim records into a single view organized chronologically. SmartChron™ organizes millions of record each year, delivering productivity savings with every case chronology. With SmartChron™ on your team, how many hours could you save?

**100%**  
of users agree  
that SmartChron™  
speeds time to  
insightful review

### THE AVERAGE SMARTCHRON USER...

- Has 5-7 sets of records per case
- Spends 30 hours manually organizing into a case chronology, plus 6 more hours to manually search for keywords
- Saves approximately 40 hours per case with SmartChron™
