## EGD Alarm Response Integrated Layers of Security

### Physical Presence. Rapid Response.

When an alarm sounds, quick response is critical. But law enforcement is overburdened and false alarms are costly. Turn to EGD Alarm Response and let us investigate and take action.

Once alarms are triggered, EGD response officers are immediately dispatched to:

- determine false alarms from real emergencies
- respond to your pre-set custom protocols
- clear your perimeter and buildings of threats
- contact law enforcement if needed

“*Unlike cameras, beams or guards that deal with theft once the thief is in the yard, EGD is a proactive solution that keeps thieves from ever entering the property.*”  
 — Allen Iskiwitz,  
 President, Iskiwitz Metals

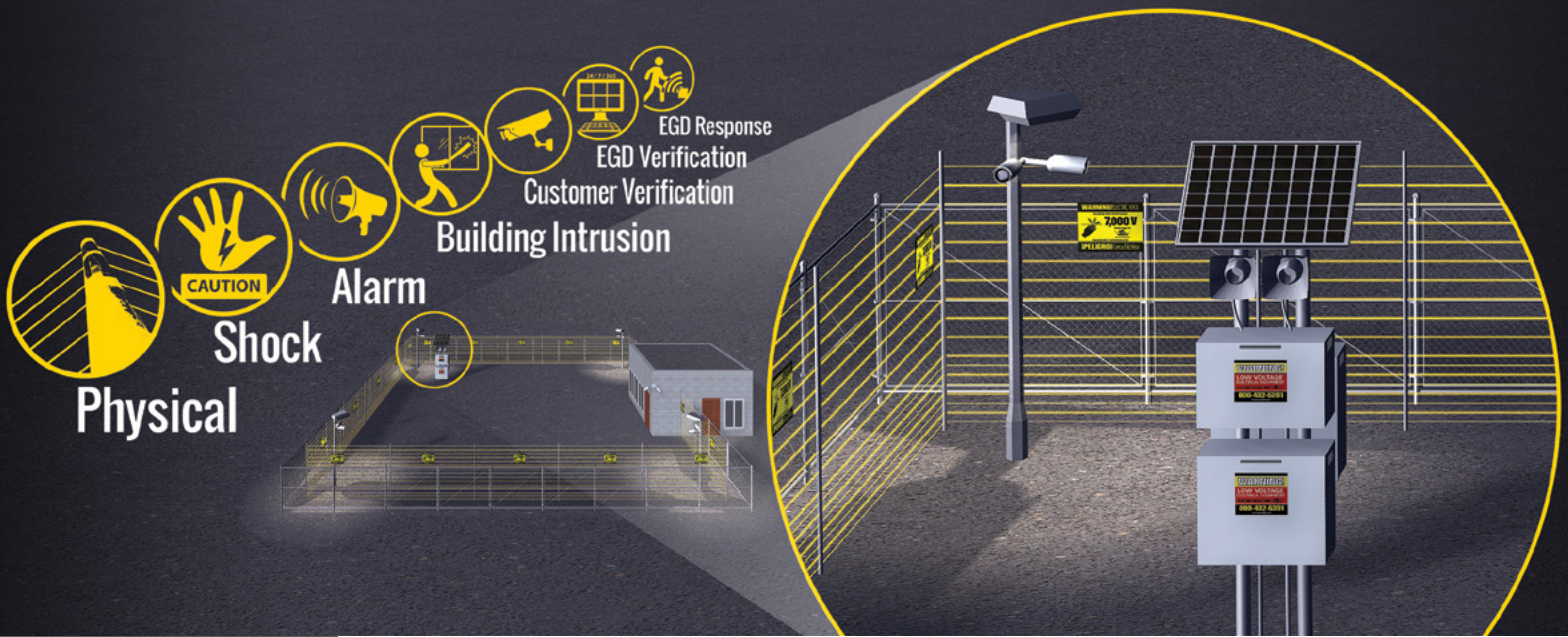

Add EGD Alarm Response to your security environment to:

- reduce costs associated with false alarms
- get 24/7 alarm dispatch and monitoring services
- gain peace of mind

EGD Alarm Response is available with EGD Alarm Verification.

#RelentlesslyProtecting

**Don't Take Our Word for It.**

*Join the 98% of customers who report **ZERO** external theft after installing EGD.*

*Cargo theft expert J.J. Coughlin calls EGD the "perfect solution" in security.*

## Integrated Layers of Security

### **A Force Multiplier.**

Major brands coast-to-coast depend on the deterrent value of EGD's electric security fence. The Physical, Shock and Alarm core layers of our system:

- deter, detect and delay any criminal
- stop crime anywhere on your property
- deliver continuous security that never sleeps

The more layers you add to your security environment, the greater the power of deterrence EGD delivers. But we don't stop there. Add on any or all of our Layer, Technology and Spot Enhancements for more protection, less hassles and greater peace of mind. Better deterrence. Better accountability. Better security. That's the power of Electric Guard Dog.
