FDIC

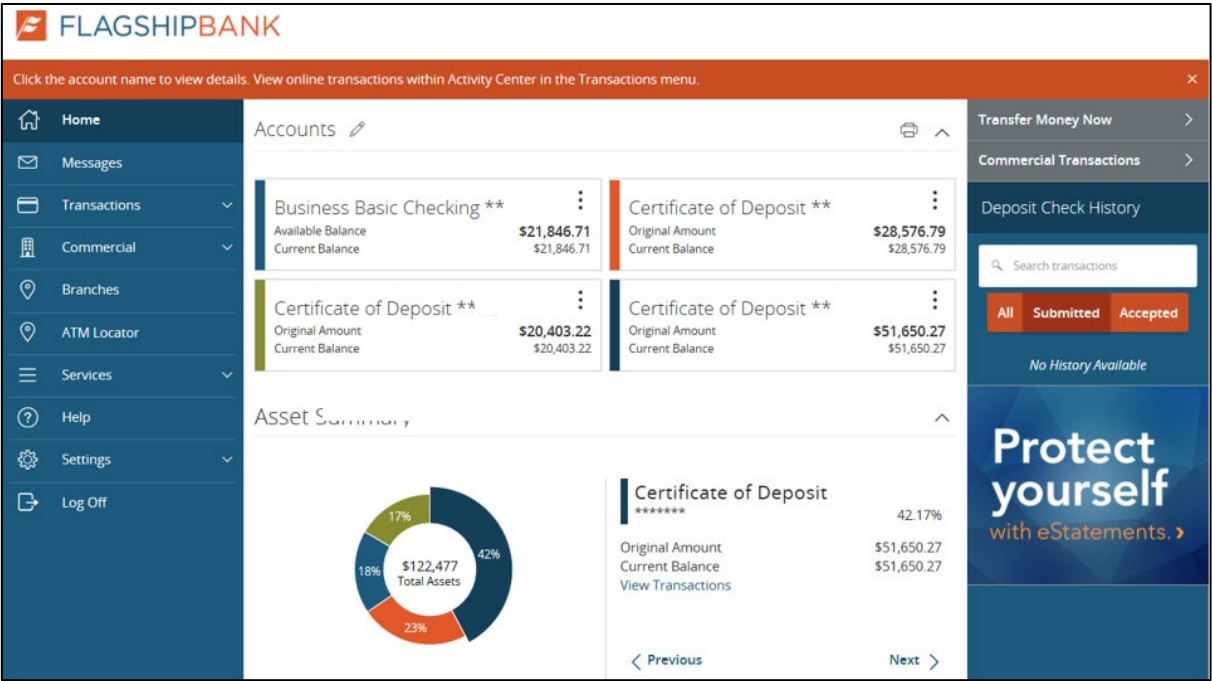

Bank seamlessly across all of your devices.

Online and mobile banking provides an improved account management experience. The interface and features are consistent and intuitive, making managing your information simpler and faster.

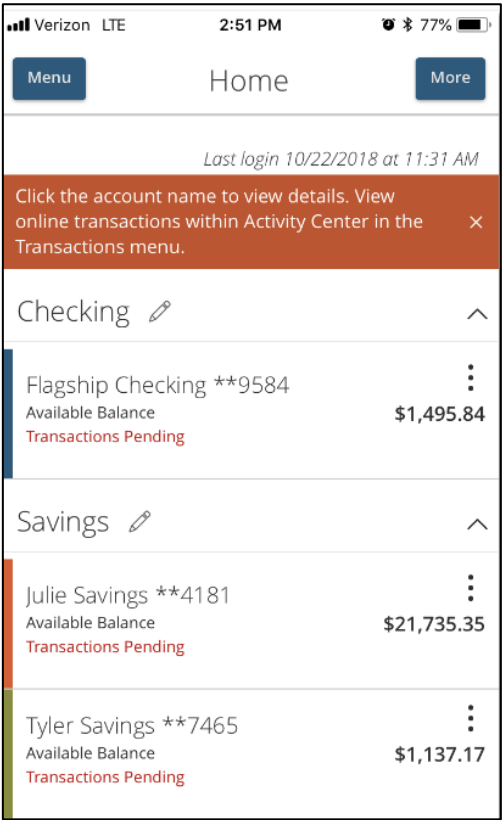

You can perform the same tasks with the feel and look across each device. These tasks, however, are relative to the device that makes the most sense. For example, you can take a picture of a check for mobile deposits on your phone, but not on a desktop.

When you make a change while using one device, it is reflected in another. If you update a setting in online banking, the same setting takes effect in mobile banking the next time you log in.

Desktop View

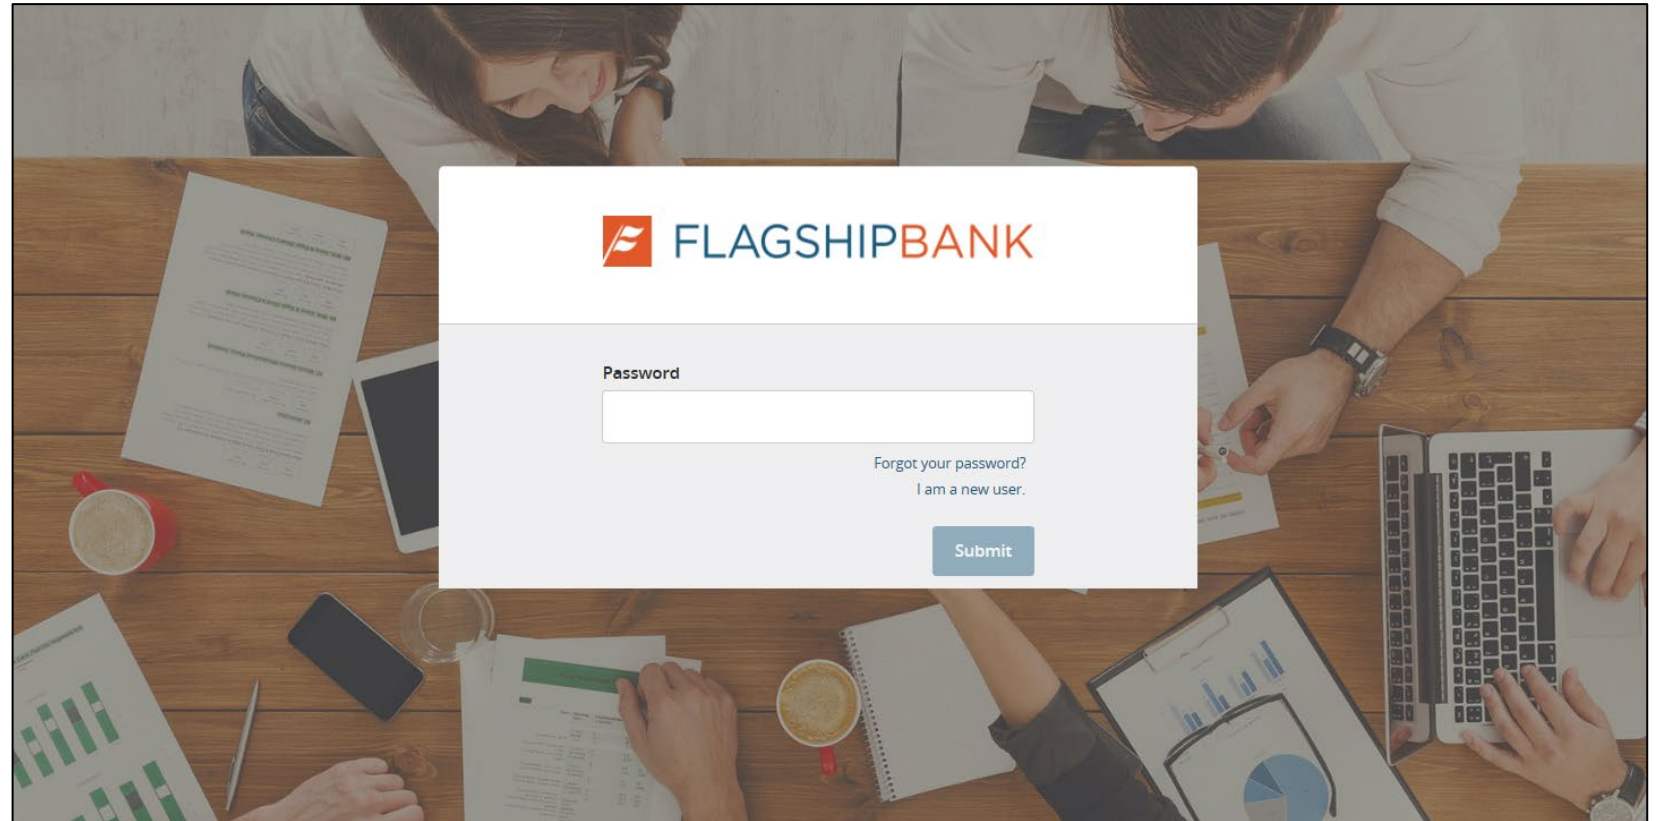

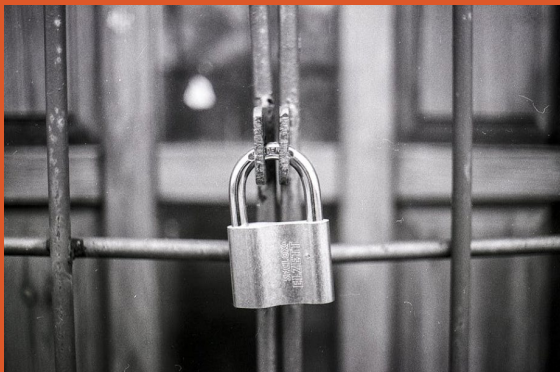

Mobile Banking View

Multi-layered Security.

- ✓ Multi-factor authentication, including secure access codes. Security access codes are online security credentials that add an extra layer of identity protection when you log into online banking.
- ✓ Real time intelligence-behavioral & transactional data analytics
- ✓ Passcode authentication
- ✓ Touch & Face ID authentication

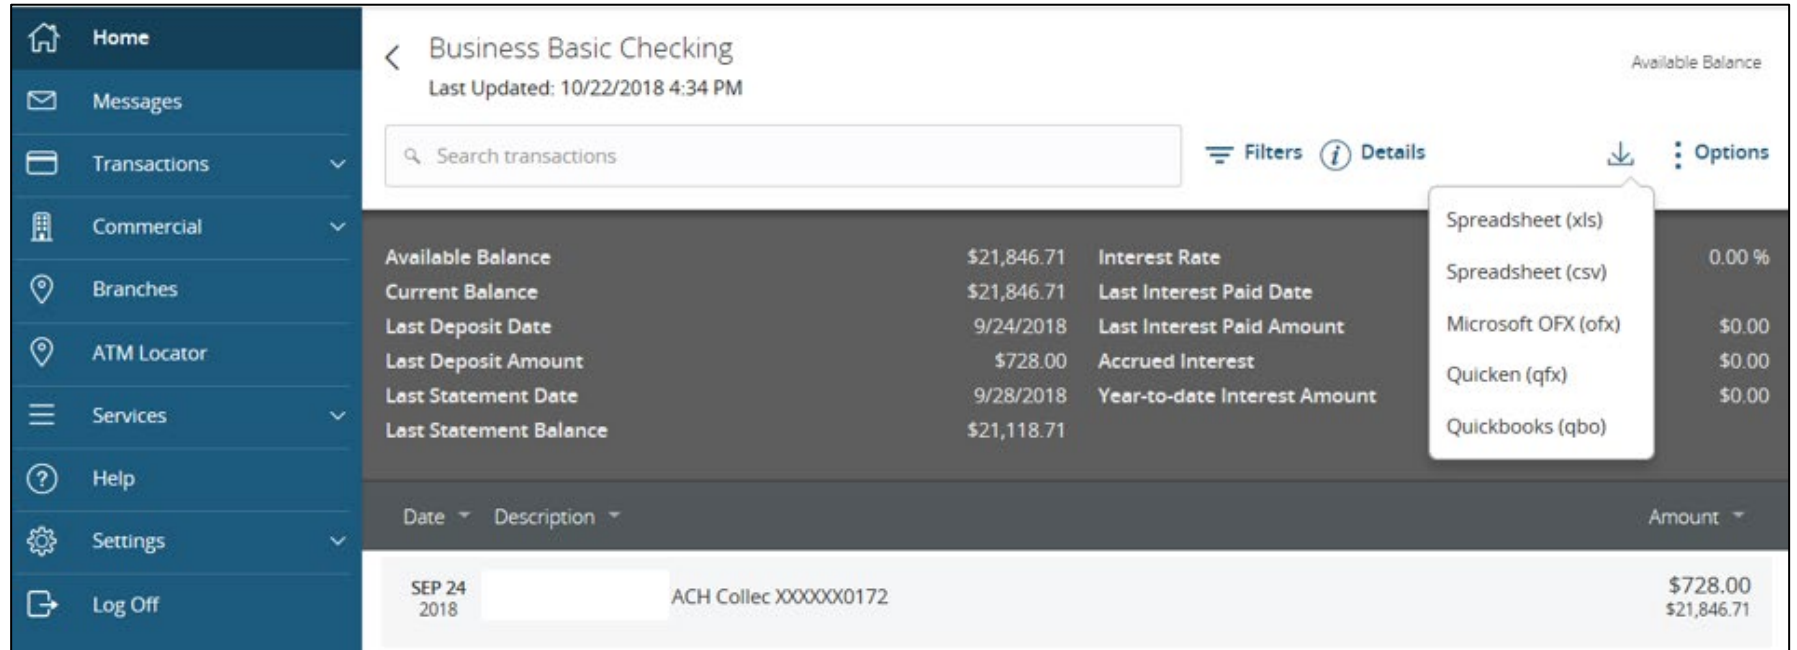

Export Transactions.

Download your transaction history to facilitate account management between platforms.

Supported files:

- ✓ Spreadsheet (xls)
- ✓ Spreadsheet (csv)
- ✓ Microsoft OFX (ofx)
- ✓ Quicken (qfx)
- ✓ Quickbooks (qbo)

The screenshot displays a banking application interface for a "Business Basic Checking" account. The top navigation bar includes links to Home, Messages, Transactions, Commercial, Branches, ATM Locator, Services, Help, Settings, and Log Off. The account summary section shows the available balance as \$21,846.71 and the current balance as \$21,846.71. A search bar and filters are available for transactions. A dropdown menu is open for the "Options" icon, showing the following export options:

Export Format	Value
Spreadsheet (xls)	0.00 %
Spreadsheet (csv)	
Microsoft OFX (ofx)	\$0.00
Quicken (qfx)	\$0.00
Quickbooks (qbo)	\$0.00

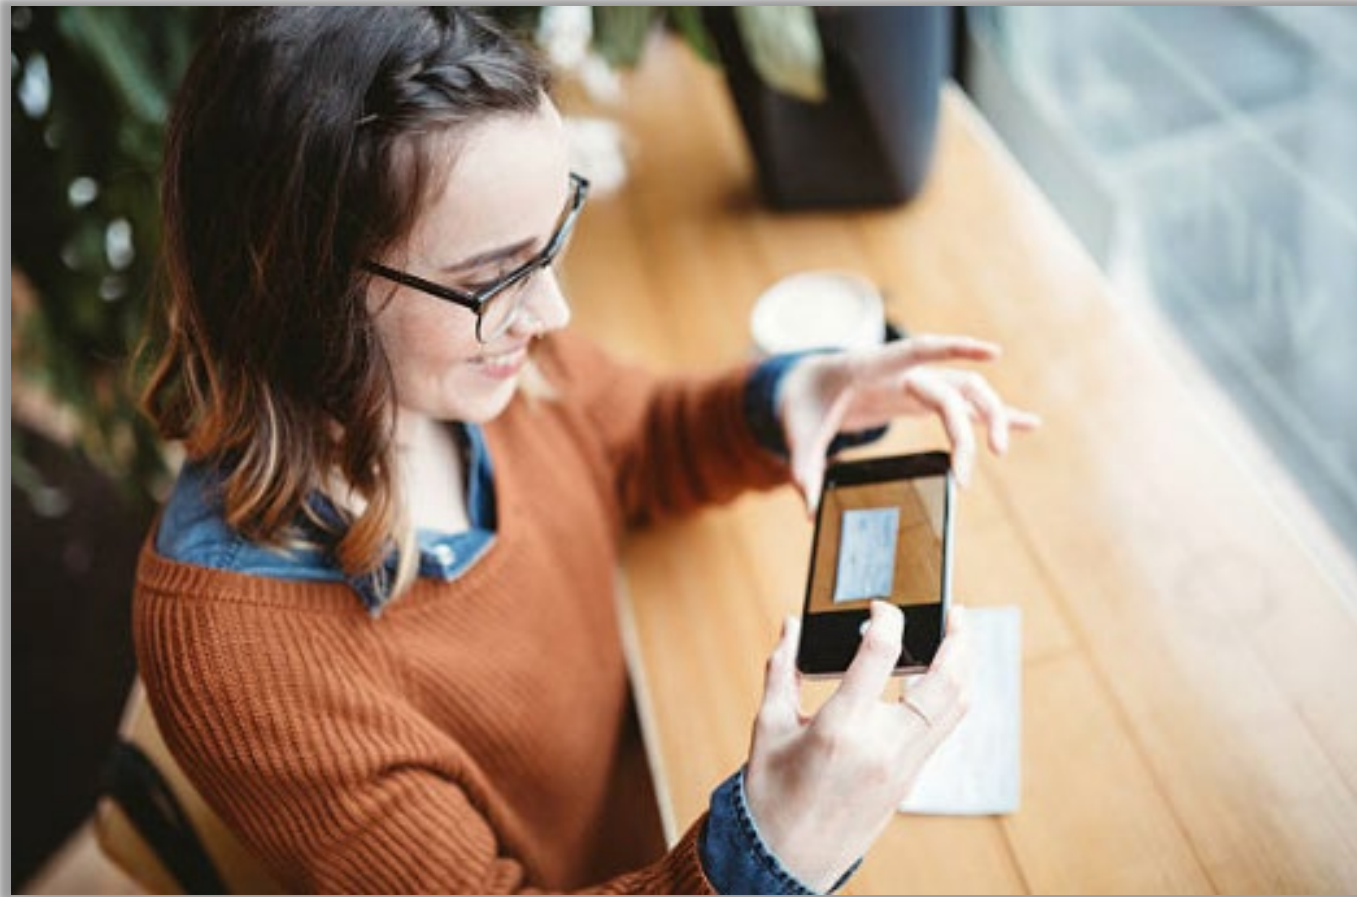

The transaction list below shows a single transaction on September 24, 2018, for an ACH Collection of \$728.00, resulting in a new available balance of \$21,846.71.

Date	Description	Amount
SEP 24 2018	ACH Collec XXXXXX0172	\$728.00
		\$21,846.71

Fast and easy deposits.

Mobile deposit is a convenient way to get checks faster to the bank. You can use a tablet or smartphone to deposit a check into your account.

You can also print or save a copy of the check when you deposit funds using the Mobile Banking app.

Link your accounts and transfer funds with ease.

You can add accounts that you own at other Financial Institutions to your online banking profile and complete a bank-to-bank transfer. You can also set up recurring transfers.

You can safely control your money using your devices.

User management tool.

It's a convenient tool that allows you to delegate and manage your online banking users by assigning specific rights or requiring approval.

These rights control what each user can do in online and mobile banking. Manage these rights by giving users the permissions that they need to perform their jobs.

The rights, features, and accounts assigned to the Business user you create for your business are driven by your needs and factors such as the business structure, number of owners, and number of employees.
