DID YOU KNOW?

One phone call can drain 23 minutes from your workday.

Lytx GPS Fleet Tracking is a low-cost way to help minimize phone time wasted on locating a driver and then getting back to the customer.

Become a fleet efficiency master

Immediate fleet status helps you respond faster, minimize phone time, and optimize fleet productivity. Fleet Tracking is built to work on mobile devices, making managing your fleet convenient and seamless, so it's a snap to keep your customers happy.

Real-time status with Google Maps, Traffic and Street View

Lytx Fleet Tracking works to track the status of every vehicle in your fleet, 24/7. With visibility to arrival, idle, and departure times, you can make fast decisions that can improve your fleet's productivity.

Find your closest driver

All customers are time-sensitive. Locating the driver closest to your service destination is a snap with Fleet Tracking—helping you respond as quickly as possible.

Route history for every trip

See every point of your driver's route, including speeding incidents, and how long they spent at each stop.

Set boundaries for your fleet

Custom geo-fences let you choose approved areas, routes, and business hours for your fleet. Immediate alerts notify you when vehicles break those rules.

Lower the high cost of idle time

A typical heavy-duty engine burns nearly a gallon of fuel per hour when idling. Use Lytx Fleet Tracking to help you quickly spot excessive idle time so you can reduce fuel costs. Easy-to-set alerts let you know when a vehicle has been idle for ten minutes or more.
