

Trench Safety Stand Down

June 17-21, 2019

In support of OSHA's [National Emphasis Program on Trenching and Excavation](#) the National Utility Contractors Association (NUCA) and the North American Excavation Shoring Association (NAXSA) have sponsored the 2019 Trench Safety Stand Down.

Safety Stand Downs provide employers with an opportunity to focus on the hazards associated with a particular task by providing relevant safety information to their employees and others.

The goal of the 2019 Trench Safety Stand Down is to reach as many workers as possible who may be exposed to trenching and excavation hazards and to provide essential safety-related information to reduce the number of fatalities and injuries that occur annually throughout the Nation.

Consider participating in this event to increase employee awareness of the dangers associated with trenching and excavation work and to demonstrate your continued commitment to your employee's health safety.
