

Eight Ways Covid-19 is Changing Construction

A new normal for the construction industry

Living and working in the environment of the coronavirus has resulted in many changes to the norms of daily life, including changes in the construction industry. As restrictions on business operations and stay at home orders begin to expire, changes will continue to be seen in the construction industry. The changes range from an increased emphasis on safety to extended project delivery times. Here is a list of eight ways COVID –19 has recently changed the construction industry that is likely to continue in the future.

- Jobsites will be cleaner and safer
- Distancing will be the norm, via technology
- Projects will take longer
- Telework will become more common
- Union influence will grow
- Demand for project types will change
- Supply chains will recalibrate
- Modular adoption will increase

Additional information about these changes can be found in the following article.
