

CareFree Data Backup & Disaster Recovery

Your All-In-One, CareFree Solution to Data Storage and Disaster Recovery.

Do you know . . .

How often you back up your organization's data off-site?

What you would do if all of your data were erased or corrupted?

How long it would take your company to recover from a disaster?

CareFree Data Backup & Recovery

1. An off-site storage center housing your organization's critical files and data
2. A service that allows fast recovery after hardware malfunctions, system crashes, and other unforeseen catastrophes.
3. A program that regularly and automatically checks file integrity and offers a Live Help Desk to facilitated data recovery.

It's like insurance for your data.

When you think about it, a lot of running a business comes down to planning. You examine projections, create budgets and plan major purchases well in advance. Despite this, many companies neglect to plan ahead for something that could lead to the end of their business entirely: data loss.

Think of what your data means to you; client files, employee records, financial records, licenses, tax records, banking information, contracts and more. Losing even some of this data can lead to legal regulatory ramifications, client dissatisfaction, lost productivity, revenue loss, and business shutdown.

Of the companies that experience data loss, whether through system failures or natural disasters, at least 40% close immediately and 80% never recover financially.

With odds like that, it's important to find a reliable means of storage that can guarantee that your company will be up and running immediately after a disaster with data intact.

CareFree Data Backup & Disaster Recovery

Our Services Include:

-  **Off-Site Storage**
True peace of mind.
-  **On-Site Backups**
Plans include on-site and off-site backups. Allows for real-time recovery from local backup instantaneously.
-  **Guaranteed Response Time**
One hour or less response time.
-  **24/7/365 Hourly Snapshots**
Recover everything back to an hour ago, at most.
-  **Entire System Imaging**
Images entire system including OS, files, messages, applications and Windows settings to allow you to pick up exactly the way things were.
-  **Backup Integrity Checks**
Our software checks every backup's integrity to ensure a seamless recovery.
-  **Data Compression**
Reduces storage costs.
-  **Live Help Desk**
Call are always received by a live customer service representative.
-  **Less Costly Upgrades**
System images allow more rapid, less labor-intensive work station and server upgrades.
-  **Certified Data Engineers Dispatched On-Site**
Certified, experienced technicians.
-  **Dedicated Account Manager**
Consultants that understand your business.
-  **National Dispatch & Service**
Serving organizations around the country.
-  **Active Monitoring & Alerts**
Our Software notifies our engineers proactively of backup status and integrity to give you ultimate peace of mind.

External hard drives and other USB devices are far from fail proof. They only backs up files meaning recovery will be time consuming and expensive. Online backup solutions don't check data for integrity and recovery can take too long to be effective. At Framework Communications, we know that a disaster can and will happen at any time, and have put in place countless safeguards against data loss with our CareFree Data Backup and Disaster Recovery service.

Top 5 Reasons for Data Loss

- 44%** Hardware or System Malfunctions
- 32%** Human Error
- 14%** Software Corruption
- 7%** Computer Viruses
- 3%** Natural Disasters

*PERCENT OF ALL DATA LOSS

FRAMEWORK DEMONSTRATED EXPERTISE & PATIENCE WHILE DELIVERING A SEAMLESS SOLUTION TO ALL OUR VOICE, DATA, & MOBILE SUPPORT NEEDS. As promised, FwC reduced our total bill 23% while centralizing billing and creating a single point of access for support and repair needs. During a recent storm, we were back up and running before all the other businesses in the area including Chase Bank & CVS thanks to Framework. I love the peace of mind that Framework Communications delivers. *Jonathan Swain, CEO & President Kimbark Beverage Distributors*

Framework Communication can provide your organization with secure, off-site storage; and save your critical files in:

- Exchange
- SQL
