

# Practice Productivity Services

Optimizing a practice's team-based approach to delivering care.

Organizations that enhance their performance, maximize productivity, and improve provider satisfaction through robust support actually increase the value of their ambulatory network.

Electronic Health Records (EHR) and the systems that capture data can help improve productivity across the board. Even with seasoned system users, best practices erode over time as staff transitions, new services are adopted or technology is upgraded.

Practices and the technology must cooperate at peak efficiency to ensure successful quality measures, disease management improvement, patient panel growth, and revenue growth that matches service delivery.

When measuring productivity, you have to consider the whole picture, especially the age of technology, EHR workflow, and changing healthcare standards. Practices must consider metrics which are highly measurable, like wait times and income versus expense, but also “soft” metrics, like patient well-being, ease of care and accessibility.

Versatile Health understands the need to increase efficiency, improve quality and lower the costs of care in a team approach across the various functions in a practice setting.

**The more you can do to increase the overall satisfaction of everyone involved, the happier and more productive your practice will be.**

### The Versatile Difference

Talented and experienced Versatile healthcare IT leaders employ proven tools, techniques, and cost management methods on every engagement.

The results are real. Our professionals are experts when it comes to discovering minor issues that result in major problems. We focus on productivity, satisfaction, user fatigue, quality outcomes, and a positive return on your practice’s investments.

### Deep Experience, Proven Results

Versatile’s on-the-ground support drives collaborative change with your teams in a way that is non-intrusive but delivers positive results. Our trained clinicians and technologists have been where you are and know what works.

We understand the unique challenges associated with planning, executing, and supporting practice environments for continuous improvement. 

---

Versatile Health enables Healthcare organizations to become more effective, efficient and productive while reducing the burden of technology on clinicians. Our unique ambulatory methodology combines an ideal balance of tools, talents, techniques, and cost management, within a scalable enterprise approach, not duplicable by larger national service firms. Healthcare IT leaders who are responsible for creating and maintaining a dynamic HIT infrastructure have a reliable partner in Versatile. Hundreds of healthcare organizations rely on our advanced techniques and experienced staff to provide reliable and optimized services for the entire HIT lifecycle to ensure that they have well-designed, efficiently operated technical environments.
