

Full Stack Developer

for just plan it (SaaS application)

Based in Aachen (Germany)

NETRONIC – Gantt Charts for Visual Scheduling

Our mission is to empower every SMB organization to gain operational agility with visual scheduling

We are obsessed about operational agility. We found it is the key for companies to operate and grow in unpredictable environments.

We are a multi-national team and have more than 40+ years of experience with visual scheduling. 60%+ of our revenue is with international clients. We are independent and family-owned.

Today, we operate in three different business lines:

1. We build visual scheduling add-ins, extensions and apps for Microsoft Dynamics 365 Business Central.
2. Our SaaS product just plan it brings easy production scheduling to small make-to-order manufacturers.
3. We provide software developers with leading-edge Gantt chart development components.

This job opening is to further strengthen our just plan it team on their international expansion path.

We are looking for people with ideas

TIMEFRAME

- Any time
- Unlimited full-time contract

TARGET OF ROLE

- Development ... in a double sense: development of our next generation software products and of your personality
- Manage the spread between concept development and execution

TASKS

- Development of the **just plan it** software (www.just-plan-it.com)
- Learn the needs of small make-to-order manufacturers and turn them into a software product which is maximum intuitive-to-use
- Developing Full-Stack; Owning every part of a feature using C#, Typescript, HTML and state-of-the-art frameworks
- Make just plan it the most user-friendly production scheduling software
- Mid-term: Ownership of product (or bespoke parts of it)

SKILLS

- Bachelor's Degree in Computer Science or similar education
- 2-3 years software development experience
- Proven experience with C#, JavaScript, TypeScript, Html, CSS
- Ideally worked for a SaaS company before
- Knowledge of production scheduling preferred, but not required
- Experience with the Microsoft Azure services & functions as well as DevOps preferred, but not required
- Open-minded; dealing well with ambiguous/undefined problems
- Above-average dedication
- Ability to think outside the box, and yet deliver down-to-earth results
- Independent learning abilities combined with teamwork attitude
- English writing & speaking skills required; German preferred, not required

Our business is versatile and fascinating. We are looking forward to an application that fascinates us. In turn, we guarantee you that there is one thing we cannot offer to you: boredom ;-)
