

Quick Set-Up Instructions

Diversity Fin™ Antenna
UHF Wireless 470-698 MHz

1. Mount the Diversity Fin™ Antenna to a stand.

2. Attach TWO coax cables from the antenna to BOTH receiver inputs.

3. Adjust the whips to be straight as shown. Aim the antenna towards the stage.

- This product is designed to fit many different stand types, 1/4-20, 3/8-16, or 5/8-27.
- Use good quality coax cables of equal length to your receiver.
- Leave fabric cover in place at all times.
- A wing nut is provided to adjust position.
