

Getting started with

Zapier

for Bizzabo

Zapier is a tool that allows you to connect apps you use every day to automate tasks and save time.

Brought to you with love by Bizzabo

With the Zapier for Bizzabo integration you can now build “Zaps” which enable you to automate parts of your business.

For instance, you can set a Zap to send contact and registration data to different applications such as your email marketing tools and finance applications. This allows you to focus on your most important work, while the automation takes care of the rest!

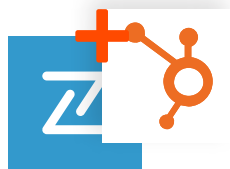

Here are some examples of Zaps that you might find useful

BIZZABO + CONSTANT CONTACT

*Attendee communication made easy:
Automate your event attendee list*

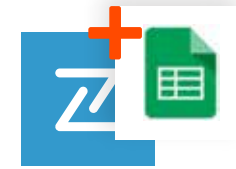

By creating this Zap, you'll be able to automatically keep track of new attendees registering for your Bizzabo event. Once it's set up, all newly registered attendees will be created as new contacts on a specific list in your account.

BIZZABO + HUBSPOT

*Make inbound great again : Communicate with your event registrants from your marketing automation platform
By creating this Zap, you'll automatically keep track of new attendees register*

ing for your Bizzabo event. Once it's set up, all newly registered attendees will be created as new contacts on your account or updated if they already exist.

BIZZABO + GOOGLE SHEETS

Team collaboration at it's best : Provide your team with a full grasp of your attendees list at all times

By creating this Zap, your whole team will be able to monitor new attendee registrations directly from your Google Sheets, in real-time. Once it's set up, all newly registered attendees will be automatically imported into your desired Google Sheets spreadsheet.

BIZZABO + XERO

*Automate your event books : Keep track of your event orders
By creating this Zap, all newly placed orders will be automatically created as new sales invoices on your Xero account.*

That's only the tip of the iceberg!

Zaps can connect more than 100+ apps to Bizzabo allowing you to become more productive than ever before.
