

# Audio CDN by Triton Digital®

The Triton Digital Audio CDN delivers the highest quality digital audio stream in the market. Our in-house solution is built for audio and is 100% owned and operated, ensuring that your digital audio content is efficient and reliable. Our Audio CDN is the foundation you need to build and maintain a successful digital audio strategy.

## Quality Performance

We are committed to delivering a flawless streaming audio experience for you and your audience. Therefore, we own and operate 100% of our infrastructure and never operate at more than 50% of network capacity, leaving necessary headroom for any audience traffic spikes.

## Reliable Network

With our dedicated team of industry experts and global infrastructure, we provide the audio streaming you can count on, regardless of your audience's size or your target market's geographic location. We ensure stability and scalability with every publisher.

## Flexible Delivery

Compatible with all popular format, codec, and media players, we can adapt the stream to your audience's needs. No matter what device or media application, our solution offers the flexibility you need to universally reach your audience.

## Built For Audio

Designed and optimized for live audio, our solution helps broadcast and pureplay publishers manage and deliver a seamless listening experience. Easily integrate your streaming strategy with our end-to-end audio solutions to further engage your audience and increase your revenue.
