

Professional Development

Designed with all teachers in mind, eSpark's Professional Development offerings help educators feel empowered and supported in the classroom.

We strive for our PD to be:

Interactive: Teachers get to explore the eSpark student experience and teacher dashboard in real time.

Actionable: Teachers leave with clear steps to launch and use eSpark in their classrooms.

Inspiring: Teachers have a chance to see how teachers use eSpark in their classrooms and brainstorm their own eSpark vision.

Data-driven: Teachers dive into their own teacher dashboards to identify struggling students & create action plans.

"[Our eSpark representative] did a great job of personalizing the experience for us. Teachers were able to ask specific questions and tune into what each other's needs were... It was very thorough and she walked through everything from start to finish. My teachers felt very comfortable leaving the room."

– **Ryanne Bigelli**

Principal from New Jersey

Based on your school's selected plan, your teachers may have access to:

24/7 Support: Whether it's during the school day or evening prep time, teachers can contact our team at all hours for in-the-moment eSpark support.

Live Webinars: From implementation basics to deep dives on eSpark best practices, teachers can register for a variety of live webinar topics or watch recordings on-demand throughout the school year.

Self-serve PD Resources: Teachers have access to self-serve PD modules, which they can access on their own time, to learn everything they need to know to get started with eSpark. Additionally, teachers have access to our comprehensive online resource center to stay up-to-date with the latest product updates and classroom materials.

60-minute Virtual PD: In a 60-minute virtual training session with an eSpark Professional Learning Specialist, teachers learn about and experience eSpark to create a vision for their own classroom. These sessions can be customized to your unique school's needs.

1:1 Virtual Coaching: Conducted via web video, these virtual consultations connect your teachers with an eSpark Professional Learning Specialist. These sessions can occur in the classroom during eSpark time or during a prep period. Teachers will get their questions answered in real time and receive individualized suggestions for best practices to bring eSpark to the next level.
