

SuperSync Amazon to NetSuite Integration

Use the SuperSync Amazon > NetSuite connector to streamline the transfer of orders from Amazon to NetSuite, push tracking information back to Amazon, and sync inventory between the two systems.

The SuperSync Amazon connector provides a real-time connection between the world's largest marketplace, Amazon.com, and NetSuite. With all orders flowing in from Amazon and all tracking information syncing back to Amazon whenever those orders are fulfilled, NetSuite becomes the central hub of data and SuperSync transports the information both ways.

Our easy setup process will get your Amazon data flowing in no time. Simply plug in your Amazon credentials and see the orders start flowing in. Supporting both Seller Central and Vendor Central, SuperSync is a complete Amazon integration solution.

Orders

- Customer
- Order (FBM, FBA)
- Fulfillment
- Billing (Cash Sale/ Invoice)
- Cancellation

Inventory

- Inventory Level (Single or Multiple Locations)
- Item Type
