

SuperSync Chrome River to NetSuite Integration

ChromeRiver provides detailed expense report and management functionality for thousands of users worldwide. Used heavily in professional services and legal industries, the ChromeRiver platform provides a robust solution for tracking expenses and other transactions. Easily sync ChromeRiver data with NetSuite using the SuperSync platform. Pull in expense reports and sync important data between both systems so you limit manual work on re-entering data and keep all users up to date on their expense report status and payouts.
