

SuperSync Shopify to NetSuite Integration

Use the SuperSync Shopify > NetSuite connector to streamline the transfer of orders from Shopify to NetSuite, push tracking information back to Shopify, and sync inventory between the two systems.

The SuperSync Shopify connector provides a real-time connection between your Shopify website/s and NetSuite. With all orders flowing in from Shopify and all tracking information syncing back to Shopify when those orders are fulfilled, NetSuite becomes the central hub of data and SuperSync transports the information both ways.

Additionally, sync any customer refunds, discounts, and other Shopify custom attributes to NetSuite. Use SuperSync's automated Shopify payment reconciliation to easily tie out credit card fees and process data through the system properly with limited reconciliation efforts.

Orders

- Orders
- Item Fulfillment
- Tracking Information
- Shipping Data
- Inventory

Customers

- Customer Mapping
- Contacts
- Customer Account Data
- Email Notifications

Reconciliation

- Subscriptions
- Payment Methods
- Custom Fields
