COOK BUILDING BUYING WORKSHEET

When deciding which shed is right for your storage needs, many factors should be considered. You want to ensure that when you pick a style and size of building, it's the right one.

Choosing the right shed can be challenging. So if you're struggling to make a decision, Cook is here to make that choice a little easier.

Use this Cook questionnaire to help you determine the right Cook building for you! And if you have additional questions find a [local dealer](#) near you, call 1-800-772-7883 or email support@cookstuff.com.

WHAT IS THE SIZE OF YOUR YARD?

First, consider the space you have in your yard and where you plan to place your Cook shed. The location needs to be accessible for our delivery trucks and be far enough from any other buildings, fencing, large trees, etc. to allow the doors to open.

It can be helpful to stake out the perimeter of your shed in your chosen spot. Then, consider if there is enough space and if you're happy with the location. Cook offer [free site checks](#) to confirm your location is a good fit for one of our buildings.

WHERE WILL YOU PUT YOUR SHED?

If you have a large yard and a lot of potential spaces to put your Cook shed, there are several primary things to consider. First, choose a space that is accessible from your home. Make it easy for your family to use it whenever possible.

Then, think about the purpose of your shed. For example: if you plan to use it as a Garden Shed, it should be adjacent to your flower beds and near a water source. If your building will be used for outdoor activities, place near your pool or an open space.

WHAT ARE YOU PLANNING TO STORE IN YOUR SHED?

If you are planning to use your shed for excess storage for your home or garage, first make a list. Think of the larger items you plan to keep in you shed. Measure things like lawn equipment, gardening supplies, vehicles and boxes, to get an idea of the space you need.

Remember to leave extra space to walk comfortably inside your shed. Also, don't forget that you will continue to collect additional stuff as the years go on.

HOW ARE YOU PLANNING TO USE YOUR SHED?

If you plan to use your Cook shed as living or working space, list and measure everything you plan to put inside. If it will be a place to entertain then consider the amount of space necessary to make your guests feel comfortable. Don't forget to consider future possible expansion.

We always recommend customers that customer go one size up from their current measurements to help account for any future growth and prevent the chance for running out of space. But if your storage needs do exceed the space in your Cook shed, we offer a Trade-Up program that allows customers to trade up to a larger size building.

WHAT IS YOUR BUDGET?

This is the big question and one that could determine the size building you select. The larger the building and the more features the higher the cost. But Cook offers two options to help customers get the right size building and stay within their budget.

We offer pre-owned buildings in like-new condition with all the same warranties as new buildings for lower prices. And our Rent-to-Own program allows customers to pay toward the overall cost of the shed with just a small deposit. Remember a high quality storage building can add value to your home.

ASK YOURSELF THESE QUESTIONS:

- ✓ After measuring it out, how much space do you have in your backyard?
- ✓ Do you have a space in mind for your Cook shed?
- ✓ Are you planning to store excess clutter in your Cook shed?
- ✓ Do you plan to store any large items (vehicles, lawnmowers, furniture) in your Cook shed?
- ✓ Will you convert your shed into a living or working space? If so, what?
- ✓ Do you need extra loft space in your Cook building?
- ✓ Are you looking for extra accessories with your building? If so, what?
- ✓ What color do you want for the siding and shingles on your Cook building?
- ✓ What building style would compliment your home's décor best?

Use your answers to determine which of our versatile Cook portable warehouses designs is right for you.

BARN

The Cook Barn is the perfect building for anyone who needs extra storage space for their excess stuff and wants a functional, low profile building. The Cook Barn is offered in 8, 10 and 12 foot sizes.

The 8 foot Barn can hold gardening tools, pool supplies and for all small storage needs. The 10 foot Barn is perfect to hold power equipment, lawnmowers and for medium storage needs. The 12 foot Barn is perfect for storing large items like outdoor furniture, grills, bikes and all-terrain vehicles.

GARDEN SHED

The Cook Garden Shed is the perfect building for anyone who needs extra storage space for a hobby or just more room for their excess stuff. It offers a specialized roof design with soft-fitted front, which adds increased protection from weather.

The Cook Garden Shed is offered in 8 and 10 foot sizes. Every Garden Shed comes with shutters and flower box included in the purchase price.

The 8 foot tall buildings are perfect to store gardening tools or use as a plotting shed or children's playhouse. The 10 foot tall buildings have space to store lawn furniture, equipment and for all medium storage needs.

LOFTED BARN

The Cook Lofted Barn is the perfect building for anyone who needs a lot of room to store larger items. It's the number one selling building with the most cubic space and provides plenty of overhead space. The Cook Lofted Barn is offered in 8, 10 and 12 foot sizes.

The 8 foot Lofted Barn option is perfect for medium storage needs with plenty of loft space for boxes. The 10 foot Barn can be converted into a hobby space or workshop. The 12 foot Lofted Barn is perfect for storing large items like furniture or vehicles.

LOFTED GARAGE

The Lofted Garage along with the Lofted Barn provides the most cubic feet of space. The tall sidewalls offer a large amount of headroom and the loft space helps keep the floor free for larger items. The Lofted Garage is only available in 12' wide buildings. The 12 foot option allows customers to store large items like cars, boats, all-terrain vehicles and tractors.

UTILITY

The Cook Utility is the perfect building for any storage needs and is the most versatile of Cook's designs. The tall sidewalls are perfect for taller shelving. The Cook Utility is offered in 8, 10 and 12 foot sizes.

The 8 foot Utility is perfect to store bikes, outdoor equipment, furniture and firewood. The 10 foot Utility is great to store large vehicles like motorcycles, all-terrain vehicles or to convert into a hobby space. The 12 foot Utility allows customers to install tall shelving, store vehicles or convert the space into a workshop.

GARAGE

The Cook Garage model offers versatility and adaptability for a diverse number of storage needs. The Garage is only available in 12' wide buildings. The 12 foot Garage allows customers to store large things like cars, boats, all-terrain vehicles and tractors.
