**ALLSTATE INSURANCE COMPANY
PRIVATE PASSENGER AUTOMOBILE
MASSACHUSETTS**

VEHICLE RATING

Allstate is introducing a proprietary Price Group Symbol and Experience Group Rating plan that replaces the ISO symbol assignment and the Vehicle Series Rating plan. Similar to the current program, a vehicle is assigned a Price Group Symbol based on vehicle Cost New and further rate modification is made by the Experience Group Rating factor. A difference from the current program is that Price Group symbol rating varies by Deductible. Model Year factors have also been updated to reflect Allstate countrywide experience.

Deductible and Price Group Symbol have been combined in the Allstate rating plan. These factors are the Allstate countrywide factors re-indexed to a base Price Group Symbol of S and a deductible of \$500 for Collision, Limited Collision, and Comprehensive coverages.

Vehicles are assigned to a Vehicle Score Group based on the make, model, and submodel of the vehicle. This program is used to reflect that loss experience for vehicles with similar cost new is different. Each Vehicle Score Group is associated with a set of EGR factors that can be found in the rating manual on page RFP-19. Experience Group Rating will apply to Parts 1, 2, 4, 5, 6, 7, 8, and 9.

Model year and symbol will be applied in two separate rating steps in the Allstate rating plan. Model Year factors were developed based solely on Allstate's model year loss information. The Allstate countrywide indicated model year factors, re-indexed to a base 2001 factor, are being implemented. Please see Section I, Page 2 for these factors.

For model years 2009 and beyond, an updated roll-up factor will be in effect for Collision, Limited Collision, and Comprehensive coverages. The factor for each model year from 2009 on will be 8% higher for Collision and Limited Collision coverages, and 6% higher for Comprehensive coverage. The factors through 2011 have been included in the manual and in Section I of this filing, on Page 2. Rule 20 of the rules manual explains this automatic factor roll-up for years 2011 and subsequent. Support for these factors has been included in Section I, Pages 3 and 4.
