# **GOVERNMENT EMPLOYEES COMPANIES**

## **MASSACHUSETTS Automobile Insurance Physical Damage Symbol Filing**

Actuarial justification for our symbol deviations can be found on the included exhibits. Column (2) shows the loss ratio calculated using collected countrywide premium and loss data from three accident years ending December 2013. The indicated change found in column (3) is the relativity of the loss ratio in column (2) for an individual make/model to the countrywide loss ratio. The loss ratios and indications are calculated using all model years combined. Column (4) shows our current symbol deviation to ISO symbol assignments, and column (5) shows the proposed symbol change. The proposed deviations to ISO symbols are shown in column (6).

This symbol deviation filing adjusts the currently aluminum bodied Audi A7, Audi A8, and Tesla Model S. We are proposing Collision deviations for the Audi A7, Audi A8, and Tesla Model S and Comprehensive deviations for the Audi A7 and Audi A8. For the Tesla Model S, our Comprehensive symbol will not deviate from the ISO symbol. Our symbol deviations are based on GEICO loss experience. We assume that MY 2015 will be similar to preceding model years and so apply the same proposed deviation to symbols.

This filing also preemptively adjusts the newly aluminum bodied 2015 Ford F-150. For 2015, the Ford F-150 will be undergoing major changes as it converts to an aluminum body. Based on input from our claims staff, we expect to see repair costs increase from MY 2014 to MY 2015 by up to 10% due to the steel to aluminum transition. We are proposing to raise the MY 2015 deviation by two symbols (as compared to the current MY 2014 deviation) to meet this expected increase.
