**GOVERNMENT EMPLOYEES INSURANCE COMPANY
GEICO GENERAL INSURANCE COMPANY
GENERAL RULES SECTION
MASSACHUSETTS**

***RULE G-11. RATE CAPPING**

Renewal premium increases by coverage will be capped for specified coverages by application of coverage level factors, subject and in accordance with this Rule. The cap will be applied to Bodily Injury, Personal Injury Protection, Property Damage, Collision, and Comprehensive coverages. Cap levels by coverage are included at the bottom of this Rule. Capping will be calculated and applied as follows:

1. The premium is calculated for the renewal term (True Renewal Premium) and compared to the premium from the same risk 12 months prior to the effective date of the policy adjusted for changing policyholder characteristics (Adjusted Term Premium). Including, but not limited to:
 - Changes in merit assignment
 - Risk progression through rating plan
 - Change to driver vehicle assignment
 - Changes to tier placement
 - Change in the amount of coverage
 - Changes to garaging location of vehicle
 - Changes to rate symbol of the vehicle
 - Changes to the number of miles a vehicle is driven annually
2. For each applicable coverage on a vehicle, if the True Renewal Premium exceeds the Adjusted Term Premium by more than the cap level, the Final renewal premium increase will be capped at the specified level. To compute the Final Renewal Premium, a factor is applied to each vehicle and coverage as follows:

Factor = (Adjusted Term Premium * (1 + cap level)) / True Renewal premium
3. The cap factor is recalculated on each renewal. If the Adjusted Term Premium was a capped premium, the comparison done in Section 1 above is to the capped premium.
4. Adjusted Term Premium as well as the True Term Renewal Premium take into account renewal endorsements or policy changes that do not involve adding/replacing coverages or vehicles. If such endorsements occur mid-term, capping will be preserved.
5. Coverages or vehicles added or replaced at or subsequent to renewal are not eligible for capping.

Coverage	Cap Level
Bodily Injury	10%
Personal Injury Protection	15%
Property Damage	10%

GENERAL RULES SECTION
MASSACHUSETTS**

***RULE G-11. RATE CAPPING**

Renewal premium increases by coverage will be capped for specified coverages by application of coverage level factors, subject and in accordance with this Rule. The cap will be applied to Bodily Injury, Personal Injury Protection, Property Damage, Collision, and Comprehensive coverages. Cap levels by coverage are included at the bottom of this Rule. Capping will be calculated and applied as follows:

1. The premium is calculated for the renewal term (True Renewal Premium) and compared to the premium from the same risk 12 months prior to the effective date of the policy adjusted for changing policyholder characteristics (Adjusted Term Premium). Including, but not limited to:
 - Changes in merit assignment
 - Risk progression through rating plan
 - Change to driver vehicle assignment
 - Changes to tier placement
 - Change in the amount of coverage
 - Changes to garaging location of vehicle
 - Changes to rate symbol of the vehicle
 - Changes to the number of miles a vehicle is driven annually
2. For each applicable coverage on a vehicle, if the True Renewal Premium exceeds the Adjusted Term Premium by more than the cap level, the Final renewal premium increase will be capped at the specified level. To compute the Final Renewal Premium, a factor is applied to each vehicle and coverage as follows:

Factor = (Adjusted Term Premium * (1 + cap level)) / True Renewal premium
3. The cap factor is recalculated on each renewal. If the Adjusted Term Premium was a capped premium, the comparison done in Section 1 above is to the capped premium.
4. Adjusted Term Premium as well as the True Term Renewal Premium take into account renewal endorsements or policy changes that do not involve adding/replacing coverages or vehicles. If such endorsements occur mid-term, capping will be preserved.
5. Coverages or vehicles added or replaced at or subsequent to renewal are not eligible for capping.

 GENERAL RULES SECTION
 MASSACHUSETTS**

***RULE G-11. RATE CAPPING**

Renewal premium increases by coverage will be capped for specified coverages by application of coverage level factors, subject and in accordance with this Rule. The cap will be applied to Bodily Injury, Personal Injury Protection, Property Damage, Collision, and Comprehensive coverages. Cap levels by coverage are included at the bottom of this Rule. Capping will be calculated and applied as follows:

1. The premium is calculated for the renewal term (True Renewal Premium) and compared to the premium from the same risk 12 months prior to the effective date of the policy adjusted for changing policyholder characteristics (Adjusted Term Premium). Including, but not limited to:
 - Changes in merit assignment
 - Risk progression through rating plan
 - Change to driver vehicle assignment
 - Changes to tier placement
 - Change in the amount of coverage
 - Changes to garaging location of vehicle
 - Changes to rate symbol of the vehicle
 - Changes to the number of miles a vehicle is driven annually
2. For each applicable coverage on a vehicle, if the True Renewal Premium exceeds the Adjusted Term Premium by more than the cap level, the Final renewal premium increase will be capped at the specified level. To compute the Final Renewal Premium, a factor is applied to each vehicle and coverage as follows:

Factor = (Adjusted Term Premium * (1 + cap level)) / True Renewal premium
3. The cap factor is recalculated on each renewal. If the Adjusted Term Premium was a capped premium, the comparison done in Section 1 above is to the capped premium.
4. Adjusted Term Premium as well as the True Term Renewal Premium take into account renewal endorsements or policy changes that do not involve adding/replacing coverages or vehicles. If such endorsements occur mid-term, capping will be preserved.
5. Coverages or vehicles added or replaced at or subsequent to renewal are not eligible for capping.

GENERAL RULES SECTION
MASSACHUSETTS**

***RULE G-11. RATE CAPPING**

Renewal premium increases by coverage will be capped for specified coverages by application of coverage level factors, subject and in accordance with this Rule. The cap will be applied to Bodily Injury, Personal Injury Protection, Property Damage, Collision, and Comprehensive coverages. Cap levels by coverage are included at the bottom of this Rule. Capping will be calculated and applied as follows:

1. The premium is calculated for the renewal term (True Renewal Premium) and compared to the premium from the same risk 12 months prior to the effective date of the policy adjusted for changing policyholder characteristics (Adjusted Term Premium). Including, but not limited to:
 - Changes in merit assignment
 - Risk progression through rating plan
 - Change to driver vehicle assignment
 - Changes to tier placement
 - Change in the amount of coverage
 - Changes to garaging location of vehicle
 - Changes to rate symbol of the vehicle
 - Changes to the number of miles a vehicle is driven annually
2. For each applicable coverage on a vehicle, if the True Renewal Premium exceeds the Adjusted Term Premium by more than the cap level, the Final renewal premium increase will be capped at the specified level. To compute the Final Renewal Premium, a factor is applied to each vehicle and coverage as follows:

Factor = (Adjusted Term Premium * (1 + cap level)) / True Renewal premium
3. The cap factor is recalculated on each renewal. If the Adjusted Term Premium was a capped premium, the comparison done in Section 1 above is to the capped premium.
4. Adjusted Term Premium as well as the True Term Renewal Premium take into account renewal endorsements or policy changes that do not involve adding/replacing coverages or vehicles. If such endorsements occur mid-term, capping will be preserved.
5. Coverages or vehicles added or replaced at or subsequent to renewal are not eligible for capping.

Coverage	Cap Level
Bodily Injury	10%
Personal Injury Protection	15%
Property Damage	10%
Collision	15%
Comprehensive	15%
