Section B

Rating Factors, Symbols, and Manual Rules

About This Section

This section contains the exhibits reflecting the rating factor and symbol revisions necessary to implement the 2016 LPMP review provided in Section A.

Exhibit 1 - LPMP Rating Factors and Symbols Table

Exhibit 1 provides the current Rating Factors and Symbols Table for the LPMP Rating Plan. There are no changes to this table as a result of the 2016 LPMP review.

Exhibit 2 - LPMP Symbols by Vehicle Series

Exhibit 2 provides the LPMP Symbols by Vehicle Series Table containing the revised symbols for each vehicle make and model contained in the review. As mentioned in the Executive Summary, the 2016 LPMP revision provides revised rating factors and symbols for:

- ◆ All vehicle series previously reviewed (1998-2015 Model Years).
- ◆ New vehicle series for the 2016 and 2017 model years, using the existing procedure for assigning LPMP rating factors when auto manufacturers introduce new vehicle models provided in Section A.

Change in Procedure from Previous Filing

One minor adjustment is introduced for vehicle series where the numbers of claims are relatively low. This adjustment ensures a smoother transition from previous review as well as of a new vehicle's rating factor. Thus, the following new rule is established:

- I. The third level of credibility is assigned to the Current Credibility Weighted Relativity as contained in filing PP-2015-RLP1. Previously, an exception was made if the Current Experience Credibility is 0.00, then the third level of credibility was assigned to unity (i.e., no surcharge or discount).

Liability and PIP/Medical Payments Vehicle Rating Factors Table

Exhibit 2: LPMP Symbols by Vehicle Series

Pages B-4-26 of this exhibit display the LPMP Rating Symbols corresponding to each vehicle make and model. Exhibit 1 in this section provides the LPMP rating factors corresponding to these rating symbols.

Two symbols are displayed for each vehicle series – one symbol for BI & PD Liability coverages and a second symbol applicable to PIP or Medical Payments coverages.

The LPMP symbols do not vary by model year, except where is necessary to distinguish vehicles that have been substantially re-engineered by the manufacturer.

LPMP rating factors and symbols were determined on a vehicle series basis. Because the LPMP symbols do not vary by individual VINs within a vehicle series, the LPMP Symbols pages do not list each individual VIN number within a vehicle series.

LPMP SYMBOLS PAGES --- VEHICLE INFORMATION

The LPMP Symbols Pages display symbols on a per-vehicle series basis, except for a few makes/models where individual models have been listed for ease of reference. For example, in cases where a vehicle series name includes a slash (/) between multiple model names (e.g., Audi A6/S6), each model is listed separately in the LPMP Symbols Pages.

Number of doors information is provided for passenger car models (which include station wagon body types) because number of doors is a vehicle series determination criterion for passenger cars.

Number of doors information is **not** provided for light trucks --- pickup trucks, utility vehicles (including SUVs), vans, and wagons (vans with passenger seats) --- because number of doors is not a vehicle series determination criterion for light trucks.
