## Accession Meeting

### Enhanced Conferencing and Collaboration

Accession Meeting provides audio and video conferencing over the internet including web collaboration features such as screen sharing, whiteboard annotations and presentation capabilities

**Accession Meeting** allows your business to have audio and video conferences using a computer or mobile device. Invite colleagues, contacts or customers to meet even if they do not have the Accession Communicator Mobile or Desktop App.

#### Meetings in “The Cloud”

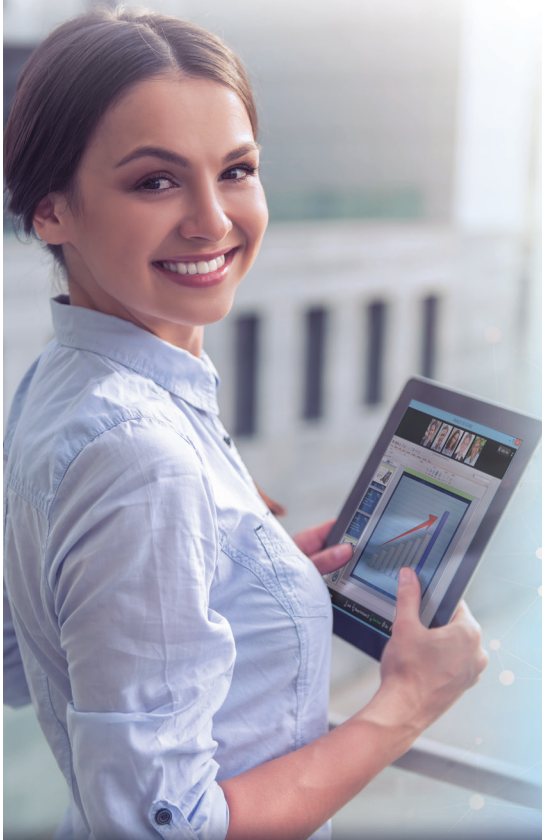

With up to 80% of business meetings now including remote participants, organizations are increasingly relying on video conferencing and collaboration tools to improve productivity. Accession Meeting from ITS Fiber is a business-class solution

for conferencing that can scale to meet most all situations while keeping costs to a minimum.

Launch a meeting and invite users in real-time by selecting the “Meeting” function from within the Accession Desktop or Mobile App to start your video conference. It can also be used as a standalone app if a customer has not subscribed to ITS Fiber Cloud Voice or the Accession App. Accession Meeting has the ability to do conferences from 4 up to 100 participants.

#### Benefits of Accession Meeting

- Ability to screen share and present to remote meeting participants
- Low cost solution for remote video conferencing with employees or customers
- Scalable – upgrade service as you need for more participants (up to 100)
- Flexible – can use desktop, laptop or mobile device for meetings
- Call/Meeting recording capability
- Can be purchased as add-on feature to Accession Mobile or Desktop App or as a standalone service
- Meetings can be created instantly or scheduled for a future date and time
