MaX Meeting

Enhanced Conferencing and Collaboration

MaX Meeting provides audio and video conferencing over the internet including web collaboration features such as screen sharing, whiteboard annotations and presentation capabilities

MaX Meeting allows your business to have audio and video conferences using a computer or mobile device. Invite colleagues, contacts or customers to meet even if they do not have the MaX UC Mobile or Desktop App.

Collaboration in “The Cloud”

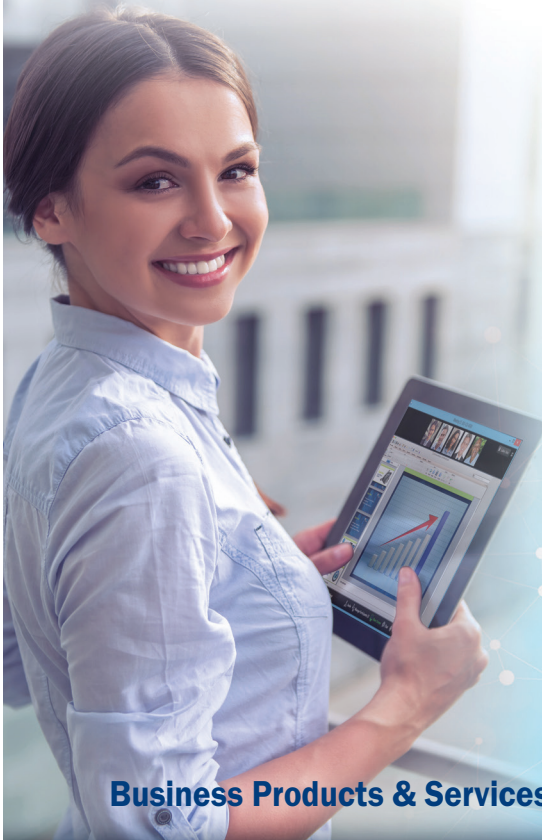

With up to 80% of business meetings now including remote participants, organizations are increasingly relying on video conferencing and collaboration tools to improve productivity. **MaX Meeting** from ITS Fiber is a business-class solution for

conferencing that can scale to meet most all situations while keeping costs to a minimum.

Launch a meeting and invite users in real-time by selecting the “Meetings” function from within the MaX UC Desktop or Mobile App to start your video conference. It can also be used as a standalone app if a customer has not subscribed to ITS Fiber Cloud Voice or the MaX UC Mobile or Desktop App. MaX Meeting has the ability to do conferences from 4 up to 100 participants.

Benefits of MaX Meeting Video Conferencing

- Ability to screen share and present to remote meeting participants
- Low cost solution for remote video conferencing with employees or customers
- Scalable – upgrade service as you need for more participants (up to 100)
- Flexible – can use desktop, laptop or mobile device
- Call recording capability
- Can be purchased as add-on feature to MaX UC Mobile or Desktop App or as a standalone service
- A meeting/video conference can be created instantly or scheduled for a future date and time
