ITS Fiber in the Community

ITS Fiber Sponsors Exam Room at Newly Remodeled Health Center

The Indiantown branch of the Florida Community Health Centers has been undergoing a transformation. Over the past few months, the local non-profit health center has been remodeling their facility to accommodate more patients and continue to improve their medical services for the Indiantown Community.

To help support the FCHC's initiative here in town, ITS Fiber gave an Exam Room Sponsor Donation to assist with the update of the Indiantown Center.

There will be a ribbon cutting for the updated health center facility on May 16th at 9:00 am to celebrate the expansion efforts.

Customer Spotlight Food Shop Shell

The Shell Station and Subway restaurant on 15373 Warfield Blvd. in Indiantown has been in business since 1986. They recently upgraded their building by doing a complete remodel inside and out.

Owner, Debby Hardee, said that they wanted to give back to their customers so they recently hosted a Remodel Grand Opening & Customer Appreciation two-day event. Customers were able to take advantage of 99¢ 6-inch subs and prize giveaways.

The Food Shop Shell has been using ITS Fiber phone service since 1986. However, after their previous internet provider proved to be unreliable, they switched to ITS Fiber Internet and upgraded to a Cloud Voice phone system.

7 Smart Gadgets For The Home

Whether it's for a birthday, a holiday, anniversary, wedding or any other special occasion, choosing the right gift is always tough. That's why we've put together this list of "smart" ideas that will please every techie in your life (or for yourself!). And of course, you can power these devices and more with ITS Fiber, the fastest Internet and best Wi-Fi available in Indiantown.

For the Home Security Guru:

1. Nest Hello Video Doorbell: With front door package theft on the rise, consider this 21st-century system that you can set and forget. The Nest doorbell includes a camera that connects to an app on your smartphone and sends an alert when someone arrives at your door. It includes a speaker system that's perfect for greeting guests or deterring would-be intruders snooping on your porch.

2. Nest -Yale Lock: Are your kids always forgetting the keys to your house? As long as you have an Internet connection, a smart lock allows homeowners to control their deadbolt, so you don't have to drop everything to let you the kids in!

For the Eco-Friendly Friend:

3. Nest Smart Thermostat: Smart thermostats like the Nest not only allow you to adjust the temperature in the room from your smartphone, but they also learn your patterns of behavior the more you use them. For instance, the unit turns off while you're away at work and kicks back on before you return. This allows you to be environmentally friendly and it saves you money.

For the Neat Freak:

4. Roomba Vacuum: The Jetsons weren't far off when they imagined a future where robots do all of your chores for you. You won't have to lift a finger to keep the home spotless with a Wi-Fi-enabled housekeeping product like the Roomba.

For the Movie & TV "Binger":

5. Roku, AirTV or Chromecast Streaming Players: Encourage everyone you know, to "cut the cord" by buying them a cool streaming device. With a symmetric, high-speed Internet connection and a subscription to Netflix, SlingTV, YouTube TV or other apps, all you have to do is activate your device and movie night can begin.

For the Yard Crasher:

6. Rachio Wi-Fi Sprinkler System: Do you know someone who likes a great yard but would rather be hanging out on their patio? If you answered yes, you should buy them a Rachio Wi-Fi Sprinkler system that gives them more freedom. The smart sprinkler runs off of your Wi-Fi and an app you install on your phone. Picture it now: They can control and monitor their sprinklers without having to leave the comfort of their patio

For the Music Lover:

7. Sonos One Speaker: For anyone who likes music and wants a big audio sound from a compact system, the Sonos One Wireless Speaker is ideal. This speaker's custom-tuned drivers and software delivers rich, powerful sound while wireless streaming lets you enjoy music in any room. You'll want to buy one for yourself, too!

These smart home items are smart choices for contemporary homeowners and are guaranteed to bring a smile—just like fast and reliable Internet and Wi-Fi from ITS Fiber!

ITS Product News

ITS Fiber Internet Options

Due to recent government and regulatory changes for the telecommunications industry, ITS Fiber is now able to offer customers a wider variety of internet service options. Coming May 1st, we will be launching an “internet only” product for both our Zymmetric Fiber and DSL Internet services.

Look for announcements with more details and pricing in the mail, your email, social media and on our website coming soon.
