ITS Fiber in the Community

ITS Hosts Tour for Martin County Educators

Martin County Educators were given the opportunity to tour four local businesses in the area, including ITS Fiber.

This tour, sponsored by the Business Development Board of Martin County, helped teachers, guidance counselors and administrators to learn about each business and what they have to offer graduating students who are planning to stay in Martin County, but may not go to a four-year college.

ITS Fiber Sponsors Education Coalition's 23rd Annual Fundraising Luncheon

The Indiantown Education Coalition event was held on February 22, 2019 at Indiantown Middle School to help support college scholarships and classroom grants for Indiantown Students.

Employees of ITS Fiber assisted with the luncheon and the company donated resources and gift baskets for the fundraising raffle.

REMEMBER TO CALL BEFORE YOU DIG!

Did you know that many utilities are buried just a few inches below ground? You can easily hit a line when digging for simple gardening projects, like planting flowers or small shrubs. Make the call to 811 a few days before you're putting a shovel in the ground to keep yourself and your community safe. Affected local utilities, like ITS Fiber will be contacted to come and mark the approximate location of our underground lines on or near your property. This prevents underground lines from being cut or damaged when you do your digging project.

Do I Really Need to Call?

YES! Don't make a judgement call; make a phone call to 811. Homeowners often think they don't need to get their utility lines marked, but every digging project should spark the need to call - even for "small" projects like planting trees.

**Be on the safe side and CALL BEFORE YOU DIG.
