

FAST CONNECTIVITY and ZERO MAINTENANCE

Performance Advantages Include:

- Zero Maintenance
- Prefabricated; Delivered to site fully assembled
- Fast installation
- Long life
- Aesthetic Appeal
- Color options
- Non-slip wear surface
- Standard Spans to 40 ft
- Truss Spans to 100 ft

Our zero maintenance Fiberglass Reinforced Polymer (FRP) trail bridges eliminate the financial strain conventional bridge products can place on park operations budgets. Bridges need to blend with natural surroundings so our high performance products combine aesthetics with function. FRP materials provide superior strength and resist corrosion from water, salt and chemicals. Our pre-fabricated, light-weight bridges are easy to install.

Short-span trail bridges go to 40 feet; with truss bridges used up to 100 ft. The long lasting walking surface has a non-slip texture. Standard colors are gray and beige with custom colors available. Bridges can be open deck surface or have curbs. Multiple railing options are available.
