

## Senior QA Test Engineer

Mobile Accord is one of the world's leading mobile solutions companies. Headquartered in Denver, CO, Mobile Accord operates mobile services in North America, Central Asia, and Africa connecting billions of people to multi-national corporations, aid organizations, and governments through their mobile phone with its GeoPoll services.

GeoPoll is a mobile polling platform that empowers organizations to conduct surveys through the mobile phone. GeoPoll is deployed in countries in Africa and Central Asia. The service gives organizations access to GeoPoll's proprietary user database which allows organizations to survey millions of people targeted by location and demographics. GeoPoll allows close to real time surveying, at no cost to the survey respondent, providing organizations the information they need, when they need it.

Mobile Accord is changing the world. We seek smart, dedicated, and passionate individuals to join our team, and help us improve the lives of citizens around the world through the mobile phone.

We are currently looking for a Senior QA Test Engineer for our Nairobi office. This position will be responsible for owning all testing in a functional product area, which includes planning, scheduling and implementing testing projects, defining test objectives, writing test cases and performing complex functional, application, regression and performance tests within a fast-paced environment. This position reports to the Director of Product Management.

### Key Responsibilities:

- Create test cases and plans for web and mobile based products by reviewing existing functionality, product requirements, and collaboration with product and development teams
- Execute test plans, identify root causes and reproduce bugs or defects to drive issues and improvements to resolution
- Enter product defects in bug tracking software with detailed information, screenshots, and steps to recreate.
- Provide testing support for release and change management process.
- Review and evaluate results and recommend corrections in technical applications and analysis throughout the QA/software testing process
- Support all trials of new infrastructure designs and services

### Qualifications and Skills:

- 5+ years of experience in a quality assurance testing or development function
- Expert knowledge of test methodologies and tools
- Management experience in Agile development environment
- Expertise in programming and scripting languages (Jscript, C#, Java) highly preferred
- Experience with automated testing tools
- Requirements and use case review experience for functional/integration test cases and plans
- Extremely self-motivated and highly organized
- Proven ability to manage and prioritize multiple, diverse projects simultaneously
- Ability to accurately estimate task durations and meet deadlines
- Strong verbal and written communication skills
- Strong analytical and problem solving skills
- Ability to take initiative, work independently and as part of a team; work without direct supervision
- Ability to exercise good judgment and discretion in confidential matters
- Enjoys a fun, dynamic and challenging work environment within an entrepreneurial culture
- Strong commitment to making a social impact
- Degree in Computer Science, Information Systems or relevant work experience required
