apollo LIMS

For over 20 years, labs of all types have trusted ApolloLIMS to optimize their workflows, exceed regulatory and quality standards, and scale their operations.

Welcome to the Apollo Alliance

ApolloLIMS is more than a software company. We're a partner invested in your lab's growth and success. Our team of lab professionals, operations experts, and engineers brings you deep expertise, proven best practices, and unparalleled support.

Built to Power the Modern Lab

Flexible Workflow

Run your lab your way. Configure and automate your workflow — from orders to specimen processing to reporting. Know the status of every single order and cut out costly errors.

Intuitive Navigation

Find what you need when you need it. Built by laboratory experts, ApolloLIMS was designed to support laboratory workflows, so providers, lab personnel, and IT managers can all easily access, understand, and use the system.

Seamless Integration

Easily connect your instrumentation to ApolloLIMS. No middleware required. Send and receive data from EMRs and other critical systems and eliminate redundant manual tasks.

Scalable Platform

Ready to expand? ApolloLIMS is able to easily accommodate new lines of service, new performing locations and new operational requirements to grow your business.

Compliant Solution

Confidently meet regulatory reporting and quality standards every time. Whether its CAP, CLIA, COLA or other regulatory requirements, our Quality Assurance module, complete audit trail, and security and data management safeguards have you covered.

Proven in diverse laboratories across the U.S.

- Toxicology
- Molecular
- Public Health
- Clinical
- Start Ups
- Food & Beverage
- Environmental
- Water Quality
- Cannabis

Tools for ensuring accuracy and efficiency. Tireless support for everything in-between.

ApolloLIMS is an enterprise software solution that meets the needs of every aspect of laboratory informatics. With a robust toolset of modules developed and supported by our team of lab experts, ApolloLIMS is fully configurable to satisfy your lab's precise workflow demands.

"ApolloLIMS has brought a superior level of automation to Mako. By using ApolloLIMS' instrumentation and HL7 interfaces our workflow is now completely streamlined. I would recommend ApolloLIMS to labs currently looking for a LIMS. The team is nimble and customer centric."

— Josh Arant, Founder/COO, Mako Medical Laboratories

Outreach Portal

Our HIPAA-compliant, web-based portal connects your lab with remote sites and provider offices so their staff can place orders and print specimen labels. You can also grant providers access to search, view and print specific results at any time.

Lab Automation

Automation is the road to operational excellence. ApolloLIMS equips you with an array of options. Manage data from instruments to boost efficiency, integrate robotics to reduce errors, or auto verify specimen results.

eXchange

Interoperability is here to stay. ApolloLIMS can send and receive data in a range of protocols and file formats. That means diagnostic and demographic information, orders, results, billing interfaces and more are all supported.

Quality Assurance

To help you maintain high quality standards, the ApolloLIMS QA module captures incidents, assigns them accordingly, tracks progress, and documents the resolution. Set up rules for quality measures, specific accounts, tests, or result values to automate the entire process.

Document Imaging

It's time to finally go paperless. With Apollo Document Imaging, you can scan and associate any type of document with a specimen or customer account. Add our batch scanning option to handle high volumes and enable intelligent processing to extract key words and patient results.

See what it means to have the power of Apollo on your side.
