

## ADVISEMENT SOLUTIONS

Let us focus in on security so you can focus on driving your business forward

As a large enterprise, the unique needs of your business can make it challenging to grow without also increasing your risk exposure.

As threats from cyberattacks are becoming increasingly complex, you need security solutions that are responsive and flexible, keeping pace with the evolving business landscape and the needs of your users.

*"Cybersecurity workforce shortage to reach 2 million by 2019."*

## Our industry-leading advisement services are based upon two decades of real world experience

Securion's expert team will design and implement tailored security solutions that leverage your existing systems to support your staff and help you meet your business goals.

As your trusted security partner, our vendor neutral advisement services are designed to create the best solutions for your business needs. In addition to staff augmentation and security audits, we can aid in incident response, data security classifications, strategy, architecture, and the creation of security policies and procedures.

By working with a trusted partner to deliver security solutions based on your goals, you can focus on the bigger picture, safe in the knowledge your business is protected.

## Secure by Design

With decades of experience securing some of the largest IT infrastructures in the world, we combine focused security expertise with a methodology that ensures efficient, innovative solutions to match your organization's strategy. This dynamic approach to everything we do enables security, information and technology to move at the speed of your business.

Here are just some of the benefits and capabilities our tailored security solutions will bring to your business:

- **SECURITY AUDITS** - Get the information you need to take action by understanding the vulnerabilities and risk factors of a single system, or your entire organization  
  
\*We can audit to internal security policies, or for compliance to various industry and government standards such as PCI DSS, GLBA, HIPAA, SOX, COBIT and NIST
- **STAFF AUGMENTATION** - Make sure you have the right experience and skill set when you need it, so your managers can focus on critical issues, rather than temporary staffing concerns
- **CSO COUNSELING & STRATEGY** - Create an effective long term security strategy and stay informed about new trends and emerging technologies
- **COMPLIANCE MANAGEMENT** - Take the guesswork out of regulatory compliance with a fully integrated or standalone solution that offers clear and concise reporting, remediation advice and risk evaluation
- **SECURITY POLICY & PROCEDURES** - Define effective policies that improve efficiency and balance the needs of your business with the capabilities of your staff
- **PRODUCT SELECTION** - Get the best product recommendations based on expert knowledge and experience with our vendor neutral approach that solely focuses on the needs of your business
- **RISK MANAGEMENT** - Accurately identify threats, assess vulnerabilities and determine risks with our unparalleled experience in securing complex systems such as databases, web applications and mobile apps in the cloud

*"53% of organizations experience delays as long as 6 months to find qualified security candidates."*
