

Building foundational trust.

Code protection begins at development. Deploy apps that repel cybercriminals and stand the test of time.

Verimatrix
Code Protection

PRODUCT BRIEF

USE AN ENTERPRISE-GRADE SECURITY TOOLKIT

It's critical to maintain customer trust by building SDKs and apps that won't become an entry point for hackers. If you are a bank or fintech company, medical device manufacturer, insurance company, healthcare portal or a developer of enterprise-focused apps, you need Verimatrix Code Protection.

Meet Tough Industry Requirements with Proven Security

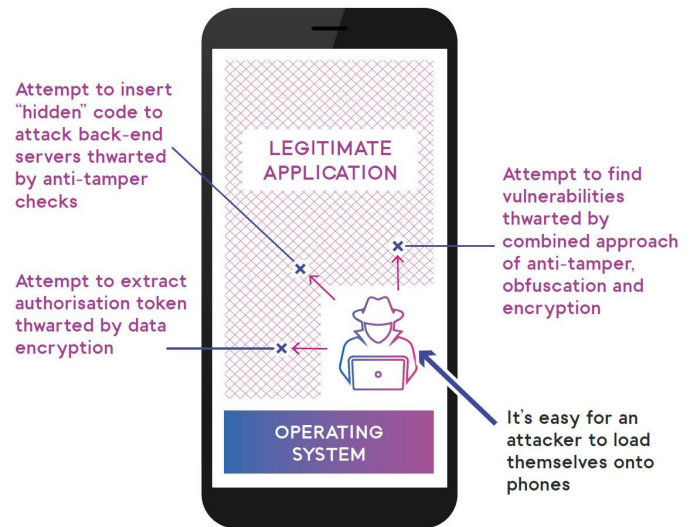

Verimatrix Code Protection includes anti-tamper, obfuscation, environmental checks, jailbreak and root detection that meet the strict security requirements of the most regulated industries. This automated solution helps maximize protection for a wide variety of organizations -- especially those that must achieve compliance with specific rules and laws.

Free Up Resources with Self-Defending Protection

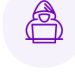

Verimatrix Code Protection utilizes powerful, intelligent and automated tools applicable across any environment -- including mobile and IoT platforms. This eliminates human error and allows development teams to focus on other priorities rather than spending time writing scripts or configuring tools.

Reduce Time-To-Market with Easy Implementation

This low impact, turn-key software security solution does not require code changes or SDK integration. By using an automated code analysis that integrates straight into your build system, you will dramatically reduce time-to-market and streamline maintenance after platform updates.

The Right Tool To Keep Your Code Secure

- 
Anti-Tampering - Creates an interconnected "check network" to prevent code from being modified or lifted and used out of context. It also prevents protections from being removed
- 
Code Obfuscation - Counteract analysis of your code with control flow, arithmetic and symbol obfuscation
- 
Environmental Checks - Trust that your code is executing where it should and not elsewhere
- 
Jailbreak & Root Detection - Automated detection of jailbroken and rooted phones
- 
Reverse Engineering Prevention - Each area of code is protected by multiple automated checks
- 
Intelligent, Automated Tools - Code analysis eliminates human error from complex build processes

The Power of Verimatrix Code Protection

App Shield

Online service for easy protection of mobile apps

- One Step
- Security Analytics

- APK & Xarchive
- Obfuscation
- Environmental Checks
- Anti-tamper
- Intelligent Protection

Mobile Tools

Developer tools that operate on a finished mobile app

- Code Optimization
- Signing Enforcement
- Asset/Resource Encryption
- AAR

Native Tools

Developer tools that integrate with build systems

- IoT Devices
- NDK
- iOS Code
- MacOS
- Linux
- Windows

Platforms

- Android
- Apple
- Linux
- MacOS
- Windows

Languages

- C/C++
- Objective-C/C++
- Java
- Swift
- Kotlin

About Verimatrix

Verimatrix (Euronext Paris: VMX) helps power the modern connected world with security made for people. We protect digital content, applications, and devices with intuitive, people-centered and frictionless security. Leading brands turn to Verimatrix to secure everything from premium movies and live streaming sports, to sensitive financial and healthcare data, to mission-critical mobile applications. We enable the trusted connections our customers depend on to deliver compelling content and experiences to millions of consumers around the world. Verimatrix helps partners get to market faster, scale easily, protect valuable revenue streams, and win new business. To learn more, visit www.verimatrix.com.
