

Enkamat[®] 7020

Civil Products — TRM

Product Description

Enkamat[®] 7020 is a 3-dimensional turf reinforcement mat (TRM) made of continuous monofilaments fused at their intersections. Ninety-five (95%) percent of the Enkamat is open and available for soil, mulch and root interaction, creating the most effective root reinforcement mat (R2M) available. Enkamat is manufactured from nylon to eliminate the buoyancy factor associated with submerged conditions and provides permanent TRM protection in vegetated channels, as well as on slopes.

Applications

- ✓ Permanent erosion control for vegetated channels with expected shear stresses ≤ 17 psf.
- ✓ Permanent erosion control for moderate to steep slopes ($\leq 0.5H:1V$).
- ✓ Support and enhance performance of ecosystem plants.
- ✓ Excellent substrate for hydraulically applied mulches for application where calculated hydraulic forces exceed the threshold of the mulch itself and/or unreinforced vegetation.
- ✓ Meets requirements of FHWA FP-03 Type 5C TRM
