

Lightning Bolt optimizes the physician scheduling workflow with automation technology that brings balance to complex scheduling variables.

The most cutting-edge physician scheduling platform on the market.

The Challenge

Aligning key scheduling stakeholders' needs

SCHEDULERS

- Accurate and efficient scheduling process
- Time savings
- Satisfied physicians

CLINICIAN LEADERS

- Workflow efficiency and transparency
- Equitable schedules
- Optimal provider utilization

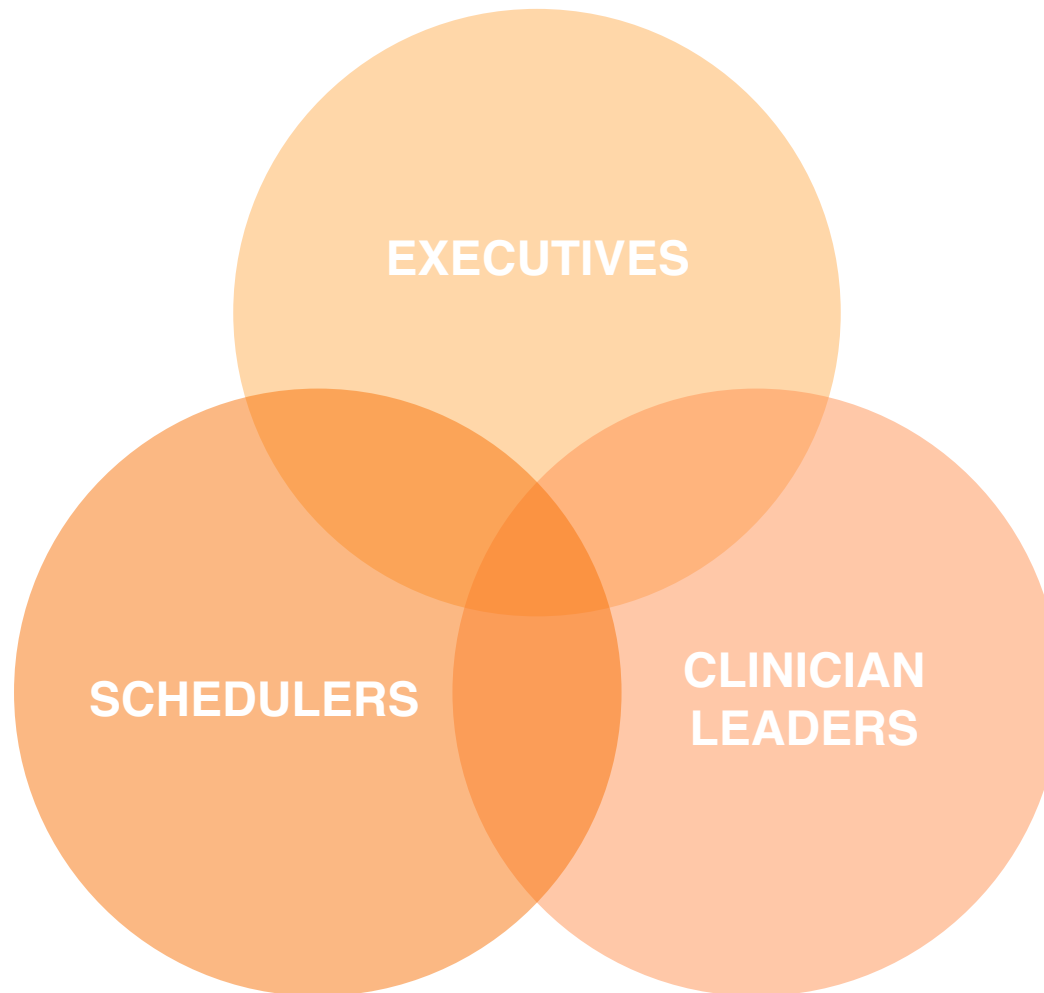

EXECUTIVES

- Coordination across care teams
- Optimized coverage to meet patient demand
- A scheduling solution with proven value

The Solution

Advanced technology that automatically balances many complex variables

The Lightning Bolt Difference

Work-Life Balance

- ✓ Serves physician needs while ensuring optimal coverage
- ✓ Considers evolving and varying definitions of work-life balance
- ✓ Increases provider job satisfaction and retention

Productivity

- ✓ Optimizes every step of scheduling workflow
- ✓ Auto-generates most efficient schedules for a balanced and productive hospital workforce
- ✓ Increases provider utilization

Patient Access

- ✓ Optimizes clinical schedules by aligning calculated patient demand with care team capacity
- ✓ Ensures delivery of the right care at the right time from the right provider
- ✓ Creates a lasting solution for increased access by leveraging a first-ever technology of its kind

Lightning Bolt Success Story

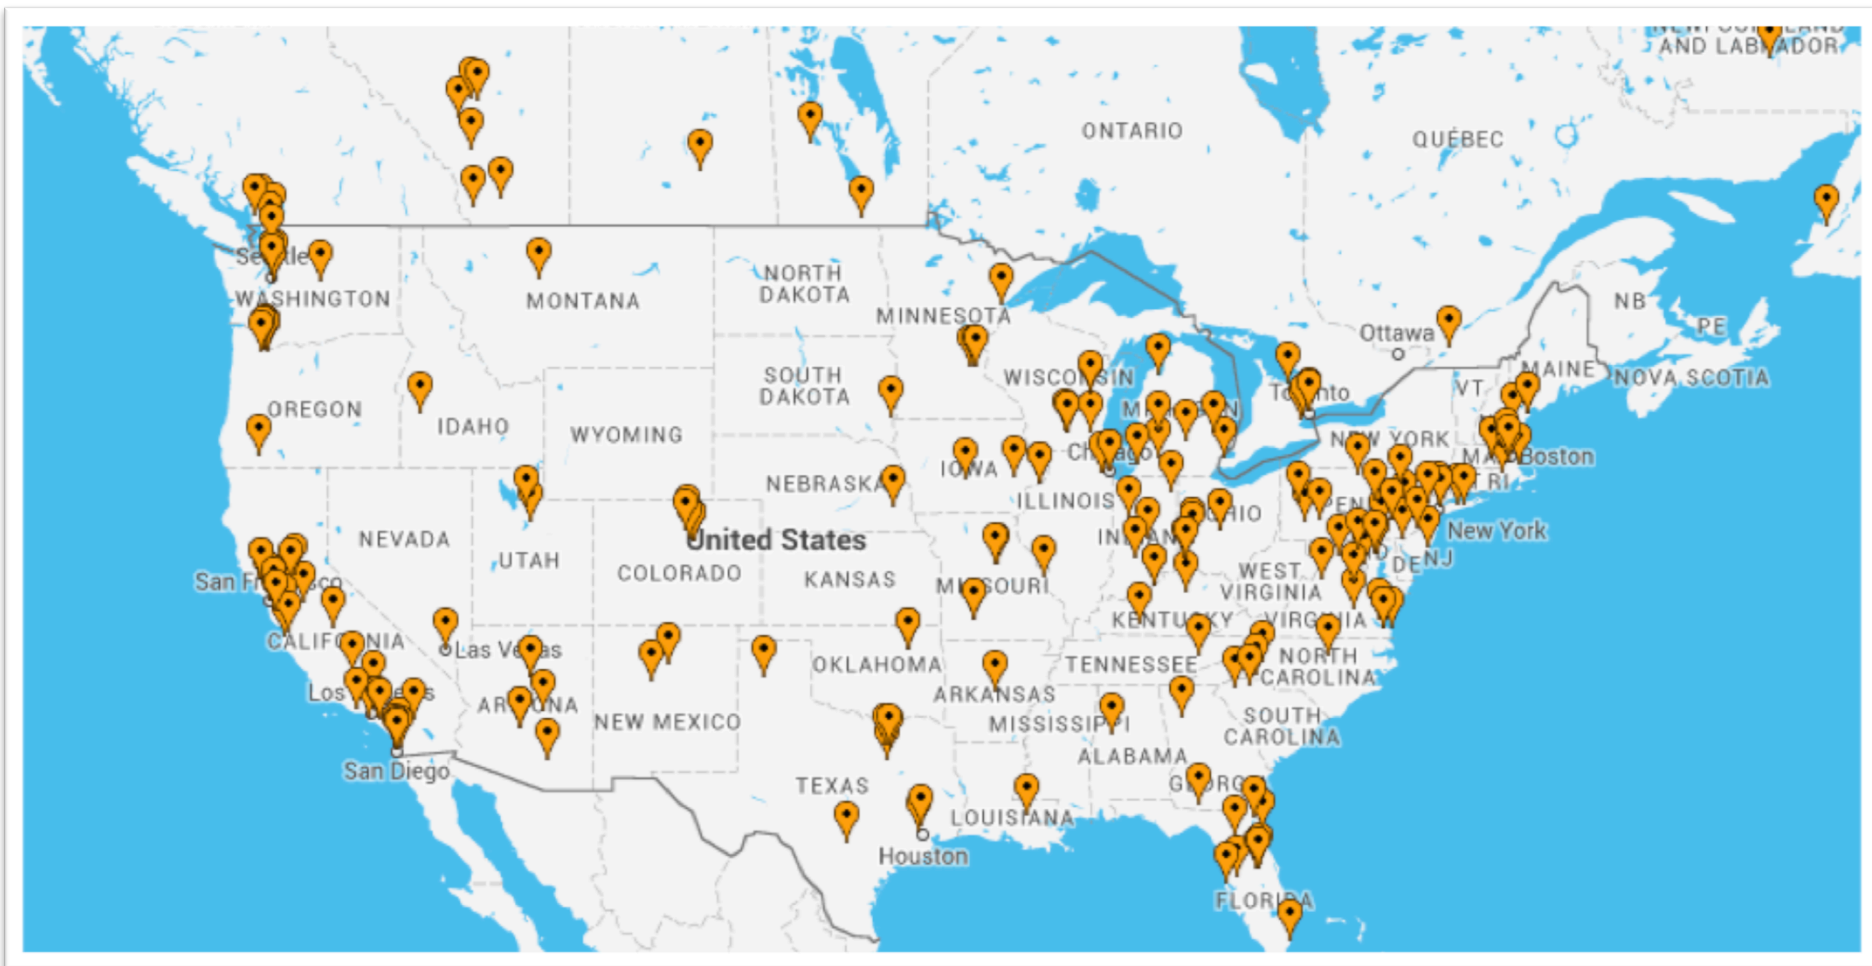

iNDIGO Health Partners

Implemented Lightning Bolt in 2008.

Results across five years:

- ✓ Over \$38 million in ROI for key scheduling stakeholders, \$7.7 million yearly
- ✓ 97.6% provider retention rate
- ✓ Increased provider utilization and compensation—35% of iNDIGO's physicians began picking up extra shifts
- ✓ Group tripled in size

Client Map

Founded on Innovation

In the late '90s, Lightning Bolt founder and CEO, Suvas Vajracharya, Ph.D., was working as a staff scientist at the Los Alamos National Laboratory to schedule massively parallel supercomputers.

A physician friend approached Suvas with the deceptively complex and time-consuming task of creating call schedules.

Realizing both supercomputing and physician scheduling require equal and efficient distribution of tasks in the presence of many complex rules of varying priorities, Suvas applied his unique experience to the complexities inherent to physician scheduling.

Founded in 2002, Lightning Bolt continues to invest heavily in research and innovation to solve complex problems in the area of physician scheduling using the latest technology.

Lightning Bolt's Mission

Lightning Bolt is dedicated to creating balanced and efficient hospital workforces through optimized physician scheduling. Since 2002, we've worked to align complex interests and bring transparency to healthcare operations.

Lightning Bolt manages over 3 million shift hours each month, scheduling 20,000 clinicians at 350 healthcare organizations across the U.S., Canada, Japan, and Australia..
