# Syncrofy

The Future of EDI Visibility is Here

Syncrofy allows you to maximize your B2B investment and gain greater visibility into your data. It's web-based solution provides self-service EDI insights to key business leaders without requiring any advanced technical knowledge, enabling users to analyze, interpret and act on information faster and more effectively.

Empowered Real-time Business Insights

Designed with **non-technical users in mind**, Syncrofy enables you to see and analyze EDI data in a simplified way from anywhere and on any device, alleviating stress on IT resources and enabling your business to **operate faster and smarter**.

With Syncrofy, users can:

- Search and view their critical EDI data as easily comprehensible business documents
- Track and follow transactions through timeline views
- View dashboards for fast and easy information

Drive Collaboration & Resolve Issues Faster

Syncrofy enables you to set notification policies that alert you when your data requires your attention. Whether it's generated purchase orders or SLA exceptions, Syncrofy will **keep you informed and in charge**. Users can also invite business partners to access their own transactions via Syncrofy, making it simpler to quickly resolve issues together.
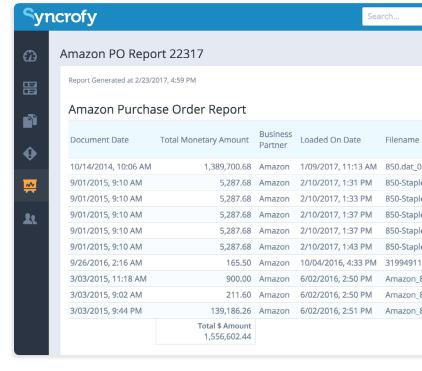

Syncrofy allows you to:

- Create notifications to remain on top of your business operations
- Set rules to proactively monitor for errors
- Get contextual alerts on SLA exceptions and other issues
- Grant partners Syncrofy access to share information and identify errors – free of additional fees or charges

Increased Revenue, Reduced Operational Costs

With **real-time access to data** as well as customizable dashboards and reports, Syncrofy enables you to make better decisions and get insights more quickly, saving you money in the process.

With Syncrofy, you can:

- Monitor business trends and processes to anticipate and prevent issues
- Reduce strain on IT and technical resources with self-service simplicity
- Expedite issue resolution and enable stronger strategic decision-making
- Create and download detailed reports of your entire EDI data environment
