Immediate Personalized Remediation

As candidates progress through training, they might need help determining where their strengths and weaknesses are. Meeting a candidate's individual needs is our priority, and sometimes requires a personalized approach. Our subject-matter experts have developed a way to identify the areas where candidates require more attention and empower them to take action.

After candidates "Simulate Your Exam" on our Online Learning Portal, they get immediate access to a Focused Review based on the exam results. Results are recorded after each exam attempt, and are accessible at any time within the Focused Review section. These results provide candidates with a direct link to the material where additional study is recommended, and are also color coded so learners know exactly what to focus on first. This platform feature focuses on an individual's study progress and provides managers with an outcome-based performance indicator.

Focused Review Key Benefits

Immediate results generated after each attempt at the Simulate Your Exam

Direct link provided to the material where additional study is recommended

Focuses on results and provides an outcome-based performance indicator
