

# Source

Proactively ensure material availability across your multi-enterprise supply chain to minimize customer stockouts, production downtime, and premium costs. Real-time supplier monitoring and alerts enable you to act around issues, collaborate across sites, and coordinate team responses from the supplier all the way through to customer service.

“ You can’t act on what you can’t see. Elementum’s insights help drive our velocity, and each day of improvement results in \$65M in free cash. ”

– Tom Linton, Flex  
Chief Supply Chain Officer

## Solve. Problems. Faster.

Shine a light on your supply network and smoothly navigate problems to fast resolution. Source lets you stay updated on the latest news events affecting your suppliers, view logistics connections with them, and receive live summaries of potential downstream impacts to materials, production, and products. Equipped with a summary of impacts and a 'smart' information feed customized to your needs, you will have the ability to escalate issues and collaborate with cross-functional teams no matter where they are in the world. Source leverages the power of the Elementum Product Graph™ so you understand how your suppliers are connected and how events flow through your business to the end customer. If a supplier suddenly closes or strikes disrupt a supplier, you can coordinate your response in real time to avoid material shortages, production downtime, and spot purchases.

## Always in the Know.

Elementum watches the world using the latest in machine learning to immediately spot problems for you. Utilizing Natural Language Processing, the platform sifts through information to pull only those stories that relate to your suppliers and material flows. Better yet, a team of analysts watches over the system and provides any observed trends or insights.

- Monitors and curates over 10 million signals every day, from news to social, so you get timely information
- Automatically summarizes supply and disruption intelligence within the context of your supply chain so you no longer have to chase data

## Act Smart, Act Fast.

Elementum Source is more than just a news app—it also consolidates intelligence on how events directly affect your suppliers, parts, products, and shipments. With a bird’s-eye view, you’ll immediately know the criticality of an event and be able to coordinate with your team members to initiate a quick response.

- Delivers real-time impact assessment of production sites, materials, products, etc. so you can jump into action and drive fast resolution
- Alerts and collaboration features empower cross-functional teams to quickly assess, escalate, and solve problems

## No More Surprises.

In addition to providing early warning on events, Elementum Source gives you insight into how your organization has responded to problems in the past. Unlike the days when you handled crises via emails and phone calls, your team will have access to the historical action data needed to learn from past successes, identify common causes of issues, and act on problems before they create unwanted surprises.

- Integrated Incident Management enables workflow escalation and coordination in a structured format so that teams can act towards measurable results
- Provides issue and action history, including how quickly teams resolved past problems, so you can incorporate into continuous improvements

## About Elementum:

Elementum is the SCM company behind the world’s supply chain orchestration platform. In today’s world, instant gratification trumps brand loyalty. To survive, brands must connect across their extended ecosystem so they can operate in real-time and deliver at the speed of customer demand. By digitally mapping the \$25T product economy, Elementum’s platform sheds light on the flow of goods around the world, and facilitates cross-ecosystem execution to ensure that products are available at the right time, place, quantity, and cost.
