ORGANIZE YOUR FLEET.

Keep tabs on all your company vehicles by creating vehicle entries in SalesPad's Dispatch module. Track a vehicle's maintenance schedule, mileage, and more, and easily add or remove vehicles from your scheduled routes.

BRING IT TOGETHER WITH A RELIABLE ROUTE.

In the Dispatch module, a route is much more than a line between Point A and Point B. Routes contain driver and vehicle information, scheduled stops, warehouse information, audits, linked sales documents, and more.

KEEP TABS WITH MOBILE CHECK-INS AND -OUTS.

No more sitting back at the office waiting for a phone call to verify that the trucks have arrived on time. The Dispatch module lets drivers check-in and -out of route stops with a single tap, keeping things simple.

Sell. Deliver. Grow.

COORDINATE YOUR DRIVER POOL.

Create driver profiles, complete with driver's license information, rates, contact information, driver-specific notes, and more, and view each driver's schedule side by side as you create your routes.

SAVE EVEN MORE TIME WITH STATIC ROUTES.

No need to enter the same basic information all over again for regularly scheduled routes. Create a static route (a route template), then make any changes to the individual route when it's time to hit the road.

PULL IN SHIPPING WEIGHT FROM SALES ORDERS.

Dispatch automatically calculates shipping weight data, in addition to other pertinent sales order data, based on the line item information found in linked sales documents. No extra effort required.

IMPROVE VISIBILITY WITH THE DISPATCH BOARD.

The Dispatch Board gives you a visual way to compare schedules for drivers and vehicles. Drag and drop drivers and vehicles onto the board to create the schedule that will keep your company humming along on time.

SCHEDULE (AND RESCHEDULE) WITH EASE.

Dispatch takes the hair-pulling frustration out of scheduling with built-in scheduling conflict warnings and many other helpful options. Add the Workwave route optimization integration to further streamline your scheduling process.

COORDINATING DRIVERS, VEHICLES, AND ROUTES MADE EASIER THAN EVER.

Create, assign, and track routes for drivers and vehicles with Dispatch. View routes from mobile devices and take advantage of easy check-in and check-out functions to update route stop statuses from the field.

If you're running both SalesPad Desktop and SalesPad Mobile and you need a powerful method of managing schedules for your fleet of trucks and drivers, the Dispatch module is your solution. Easy to learn and accessible from both your computer and your mobile device, Dispatch makes coordinating an efficient trucking schedule simple.

WHY SALESPAD'S DISPATCH MODULE FOR ROUTE MANAGEMENT?

Dispatch is intuitive. With a drag-and-drop style calendar and color-coding options for trucks and drivers, coordinating everyone's schedules is a piece of cake. Create customized truck and driver cards, then compare availability in a clean, easy-to-navigate screen and make any necessary changes on the fly. Eliminate the hassles of scheduling and free up your time to grow your business.

Dispatch saves you time, and we all know what time equals. By clearly displaying route, truck, and driver schedules on the Dispatch Board, Dispatch makes it easy to spot time-saving delivery options that allow you to more efficiently manage your trucking schedule. Easily relieve drivers, refine routes, schedule rest stops, and more. View the schedule for one day or for weeks at a time — whatever helps you get the job done.
