— PRESERVE YOUR FUTURE —

## Amethyst Arbitrage Fund

In today's global uncertainty, we at TIMC believe a holistic wealth preservation strategy will secure your wealth and children's future. Our holistic approach will help you geographically diversify your family's assets and citizenships across the globe, to better withstand this uncertainty. Our Advisors travel across the globe to seamlessly deliver exclusive investment and citizenship solutions under one umbrella.

Founded in 1998, Crystalline Management offers private and institutional accredited investors an alternative to traditional stock market investments. The company's Amethyst Arbitrage Fund is a **low-volatility** hedge fund designed to generate an **absolute return** and **preserve capital**.

Due to its highly diversified composition and the use of innovative investment strategies, the Amethyst Arbitrage Fund aims to deliver returns with very low correlation to stock and bond markets, and thereby lower the risks associated with these traditional markets. Its objective is to realize an **absolute positive return of 5 to 10%** above short-term rates (CAN 91d. T-Bills or 3 mo. US Libor, depending on product version).

The Fund's arbitrage strategies focus largely on the Canadian market by investing in **event driven situations** (mostly mergers & acquisitions), **convertible securities** (debt, warrants, etc.) and **fixed income opportunities**.
