

SOP Workflow

Enhance Standard Operating Procedure compliance and productivity.

CHALLENGE

Companies need to make sure business-critical procedures are followed consistently. To ensure compliance, companies develop Standard Operating Procedures (SOPs), and they need to devise efficient ways for workers to document the SOPs. However, paper-based or manual workflows are often too cumbersome, especially for mobile workers.

SOLUTION

Orion enhances efficiency and compliance by automating SOPs for mobile workers with voice. SOP Workflow transforms any repetitive task into voice-activated checklists and also reports insights instantly — mitigating risk while saving time for both workers and management.

Standard operating procedures (SOPs) are part of our jobs every day, but filling out forms and checklists can slow down worker productivity. Get SOPs done faster by transforming your organization's existing manual (often paper-based) processes into voice-powered automations.

SOP Workflow Benefits

- Stronger procedural adherence
- Faster SOP completion
- All-digital recordkeeping
- Real-time alerts for failed SOPs
- Reduced screen time for workers
- Automated management tasks

Automate Any Task

- Start-of-service checks
- Equipment check-out
- Environment & equipment cleaning
- Training for new workers
- Work environment inspections
- And more

SOP WORKFLOW IS EASY TO USE

1. With a mobile device, speak the trigger phrase (ex., "Begin an Equipment Check")
2. Listen for prompts and speak short answers
3. Put device away and resume work (SOP Workflow reports are instantly transcribed and transmitted to management)
